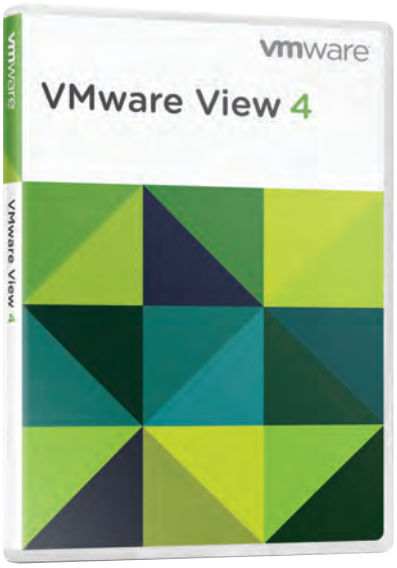
NEW Ways to Optimize Your Virtual Desktop

vmware®

New Version Improves End-User Access and Strengthens Security

VMware View™ 4.5, the industry's leading end-to-end desktop virtualization solution, significantly enhances its latest offering. End-users now find incredible freedom and flexibility with anytime, anywhere access to their virtual desktops even while disconnected with VMware View Client™ with Local Mode. Newly integrated VMware vShield™ Endpoint minimizes the risk of malware infection and simplifies antivirus administration by offloading processing to dedicated virtual machines. Complete Microsoft® Windows® 7 support that virtualizes legacy applications ends OS incompatibility issues.

As a VMware® Premier Partner and VMware® Authorized Consultant, Zones has the experience, expertise and resources to help you deploy a VMware solution that delivers a consistent high performance desktop experience. Whether you're considering desktops as a managed service or upgrading your existing infrastructure, our certified VMware View™ professionals will maximize the business value of virtualization to help you energize your business.



VMware View™ 4.5 provides the scalable management, rich user experience and common virtualization platform you need to energize your business by delivering desktops as a managed service.

Offline Access Anytime, Anywhere

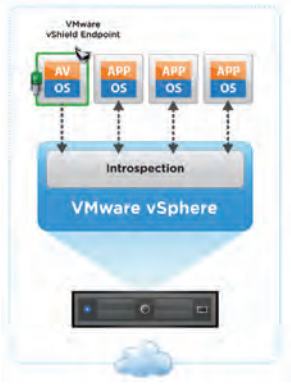
VMware View Client™ with Local Mode, the industry's first offline desktop virtualization solution, allows users **easy access** to their virtual desktops even while disconnected from the network. Innovative management provides enforcement of **consistent security and compliance** policies across connected and disconnected virtual desktops. With Local Mode you can:

- Run virtual desktops on Windows PCs, Mac computers and thin clients
- Enable ultra-mobile users to roam freely with anytime, anywhere access
- Simplify remote and branch office IT operations – deliver high-performance virtual desktops from behind the corporate firewall
- Support contractors and employee-owned IT (employees bring computers – you provide virtual machines) with full control and security
- Move complete virtual desktops between datacenter and desktop devices with security policies intact
- Keep sensitive data secure and protected in the datacenter via encryption; apply and enforced security policies regardless of network connection

Stronger Security with More Control

VMware vShield™ Endpoint works by offloading antivirus and anti-malware processing to dedicated security-hardened tamper-proof virtual machines. You **maintain control** over your data and intellectual property by keeping it secure in the datacenter. **Performance improves** by orders of magnitude and **system resources, freed up**.

- Strengthen security for virtual machines and their hosts
- Eliminate agent sprawl and AV storm issues
- Leverages your existing investment
- Schedule full and partial scans
- Minimize malware risk and simplify antivirus administration



Enhance security, maintain control, improve performance with VMware vShield™ Endpoint.

- World-class IT reseller nationwide for more than 15 years
- More than 175,000 IT products from leading manufacturers, including Symantec, IBM, Lenovo, HP, Cisco and Microsoft
- Lowering cost of IT procurement through strategic partnerships and automated systems
- Chosen as primary IT supplier by many Fortune 1000 companies

Complete Support for Windows® 7

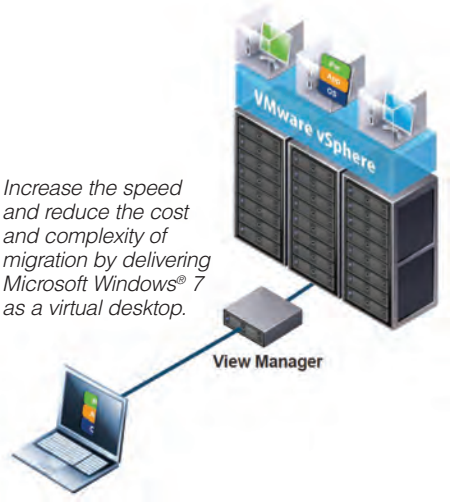
VMware View™ 4.5 reduces the cost and complexity of desktop and application migration by delivering Microsoft® Windows® 7 as a desktop. You can **rapidly provision** virtual desktops that end users can access **without upgrading** their hardware.

Virtualize legacy apps to remove OS incompatibility

Virtualizing legacy applications minimizes application incompatibility eliminates OS compatibility issues. Finally, you extend the life of your existing desktop software.

You get:

- ThinApp support for Windows® 7 virtual or physical desktops
- Support for Windows® 7 guest virtual machines – 32-bit and 64-bit
- Windows® 7 host support for View Client



Increase the speed and reduce the cost and complexity of migration by delivering Microsoft Windows® 7 as a virtual desktop.

More New Features

VMware View™ 4.5 also offers new levels of scalability, efficiency and dramatically reduces storage needs. LAN and WAN connectivity for virtual desktops increases worker productivity. Improved application delivery saves you time. And built-in protection capabilities safeguard your business. Includes:

- **Role-based administration,** monitoring dashboards, simplified reporting and support for third-party tools with VMware View™ Administrator
- **New tiered storage** support with VMware View™ Composer provides best virtual desktop performance and cost optimization that decrease your storage needs and simplify desktop management
- Full **smart card integration** with high-performance PC-over-IP (PCoIP) technology permits users to work from virtual desktops via LAN or WAN
- Agentless VMware ThinApp™ **streamlines application delivery** while eliminating conflicts and **simplifies repetitive administrative tasks**. Includes support for Internet Explorer® 6, Windows® 7 support and performance acceleration.
- VMware vSphere™ for Desktops, a **highly scalable, reliable and robust** platform offers **built-in business-continuity and disaster recovery**

Your Timetable for Desktop Virtualization

Now is the best time to take advantage of significant end-user, security, Windows® 7 support and many other features in VMware View 4.5 that can energize your business. Whether you're considering desktop virtualization or upgrading, Zones certified VMware View™ professionals are here to help.

Rely on Zones ExpertConnect™ Virtualization Team

The Zones ExpertConnect™ Virtualization team is made up of experienced professionals with an extensive understanding of all aspects of virtualization.
Zones has the following VMware accreditations recognizing our expertise:

- VMware® Premier Partner and VMware® Authorized Consultant
- VMware® Sales Professional
- VMware® Technical Sales Professional
- VMware® Certified Professional

Our virtualization specialists will help you implement a custom VMware View™ 4.5 solution, benefiting both end-users and administrators.
