

Trend Micro™

# ENTERPRISE SECURITY SUITE

Protect your enterprise with a secure foundation—from gateway to endpoint

Over time, many enterprises have deployed multiple point products from various security vendors resulting in management complexity, compatibility problems, and gaps in security. To decrease costs and complexity, enterprises need integrated security solutions with network-wide visibility and control.

**Trend Micro™ Enterprise Security Suite** is a tightly integrated suite of products that secure your network from gateway to endpoint. With comprehensive threat protection and centralized management, you can close the security gaps while decreasing costs and complexity. Powered by Trend Micro™ Smart Protection Network™ cloud-based security, this end-to-end suite delivers global threat intelligence and faster performance. You gain a secure foundation from gateway to endpoint with the following products included in the suite:

## Endpoint/Client Protection

- OfficeScan™ Endpoint Security
  - Security for Mac plug-in
  - Virtual Desktop Infrastructure (VDI) plug-in
- Vulnerability Protection

## Mail Server Protection

- ScanMail™ Suite for Microsoft® Exchange
- ScanMail™ Suite for Lotus™ Domino™

## Gateway Protection

- InterScan™ Messaging Security
- InterScan™ Web Security

## File Server Protection

- OfficeScan Endpoint Security
- ServerProtect™ for Microsoft® Windows™/Novell™ NetWare®
- ServerProtect for Linux™

## Centralized Management

- Trend Micro Control Manager™

## Enterprise Data Protection (optional)

- Trend Micro™ Integrated Data Loss Prevention (DLP)
- Trend Micro™ Mobile Security
- Trend Micro™ Endpoint Encryption
- Trend Micro™ Email Encryption Gateway

## PROTECTION POINTS

- Endpoints/Clients
- File servers
- Mail servers
- Messaging gateway
- Web gateway

## THREAT PROTECTION

- Viruses and trojans
- Phishing and targeted attacks
- Spam and bots
- Spyware and rootkits
- Hackers and intruders
- Web threats
- Inappropriate content
- Compliance risks

## ADVANTAGES

### Smart

Get consistent security that delivers proven protection across your network

- Reduce risk with comprehensive multilayered, multi-threat protection
- Increase productivity with top-rated spam prevention and URL filtering
- Stop threats before they infiltrate your network with cloud-based security that correlates web, email, and file threat data
- Protect sensitive data everywhere it goes by adding Enterprise Data Protection

### Simple

Increase security at lower costs with a consolidated, cloud-client architecture and simplified management. According to Osterman Research, Cloud-Client Enterprise Security Impact Report, you can:

- Save more than \$49 per employee using the Enterprise Security Suite
- Lower endpoint infection rates by 53 percent
- Slash IT security management costs by 41 percent

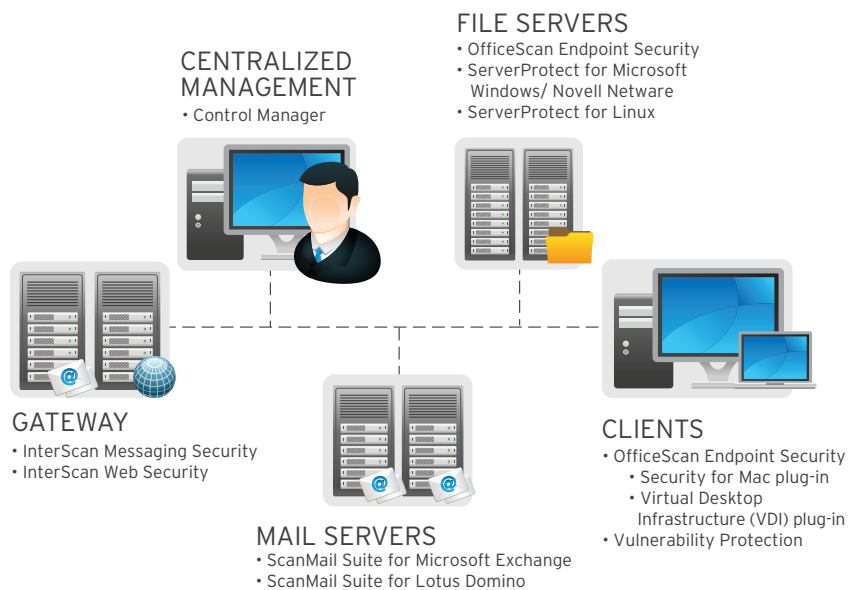

### Security That Fits

Streamline administration by enforcing threat protection policies from a single console

- Centralize policy management across Trend Micro security products
- Coordinate threat and data protection policies with optional DLP, encryption, and mobile security
- Gain enterprise-wide visibility into suspicious activity for more effective security against targeted attacks and data loss

## TREND MICRO ENTERPRISE SECURITY SUITE

Protect your enterprise with a secure foundation from gateway to client—for network-wide visibility and control.

### KEY BENEFITS

- Provides a security foundation across your network
- Minimizes risks with real-time, proactive protection
- Delivers broad platform support for heterogeneous environments
- Maximizes insight with consolidated reporting and advanced threat statistics
- Reduces management complexity and overall costs
- Prevents data loss and compliance risk with optional Enterprise Data Protection

## KEY FEATURES

### Centralized Management

#### Trend Micro Control Manager™

Centrally manage threat and data protection policies across multiple layers of your IT infrastructure, streamline security administration and policy enforcement across your enterprise.

### Mail Servers

#### ScanMail™ Suite for Microsoft™ Exchange

Block messages containing links to malicious sites. Safeguard your mail server with leading antivirus, antispam, and antiphishing protection combined with innovative email and web reputation technologies.

#### ScanMail™ Suite for Lotus™ Domino™

Implement email security as a native IBM® Lotus Domino server application. Block viruses, spam, and other email threats while reducing administration with strong group management, centralized control, and cluster support.

### File Servers

#### OfficeScan Endpoint Security

Secure your Windows servers as part of a comprehensive endpoint security framework by consolidating your endpoints under a unified infrastructure.

#### ServerProtect™ for Microsoft® Windows/ Novell NetWare®

Get real-time protection for Microsoft Windows and Novell NetWare web servers and file servers, preventing them from spreading viruses, spyware, and other web threats.

### ServerProtect™ for Linux™

Simplify and automate security operations for Linux servers, detecting malware in real time with cleanup capabilities to remove malicious code and repair system damage.

### Endpoints and Clients

#### OfficeScan™ Endpoint Security

Maximize your endpoint security and performance with cloud-based, proactive threat protection. An expandable modular architecture builds all technologies into a single endpoint agent that is deployed and managed from a single console, including:

#### Security for Mac Plug-in for OfficeScan

Achieve a consistent security deployment and policy across all endpoints, regardless of form factor or operating system with enterprise-class threat protection for Apple Mac laptops and desktops. Flashback, MacDefender, and phishing attacks have shown the need for effective, adaptive protection for Macs.

#### VDI Plug-in for OfficeScan

Optimize OfficeScan for agent-based virtual desktop infrastructure (VDI) deployments across a range of hypervisors.

#### Vulnerability Protection

Keep your endpoints shielded until patches can be deployed, or indefinitely for out-of-support or un-patchable legacy systems. We'll help you prevent vulnerabilities from being exploited with a simple recommendation scan and easy, fast-to-deploy filters.

### Gateway

#### InterScan Messaging Security

Stop the majority of email threats and spam in the cloud. Protect your email gateway with powerful software or an integrated hybrid solution that combines the privacy and control of an on-premise virtual appliance with the proactive protection of an optional cloud-based pre-filter.

#### InterScan Web Security

Protect your end users with a software virtual appliance that provides application control, leading anti-malware, real-time web reputation, and flexible URL filtering—so you can prevent web threats from entering your network.

## TREND MICRO ENTERPRISE SECURITY SUITE

Trend Micro Enterprise Security Suite creates a solid security foundation across your network with broad platform support that provides security for heterogeneous environments and protection for your unique network configuration.

### Add Enterprise Data Protection—for Complete End User Protection

Secure your data from gateway to mobile devices by adding [Trend Micro™ Enterprise Data Protection](#), a full set of data security products that integrate within your Trend Micro suite. By combining threat and data protection in a flexible, centrally-managed solution, it lowers the cost of and effort to deploy and manage while closing critical security and compliance gaps—for complete end user protection. Enterprise Data Protection is also available as part of our most comprehensive enterprise security suite: [Trend Micro™ Enterprise Security and Data Protection](#).

Enterprise Data Protection includes these products:

- Trend Micro™ Integrated Data Loss Prevention
- Trend Micro™ Mobile Security
- Trend Micro™ Endpoint Encryption
- Trend Micro™ Email Encryption Gateway

### MINIMUM SYSTEM REQUIREMENTS

MULTILAYERED PROTECTION	PLATFORM COVERAGE	ADVANTAGE
<b>Gateway</b>		
<b>InterScan Messaging Security</b>	<ul style="list-style-type: none"><li>• Software Virtual Appliance: VMware, Hyper-V, Software Appliance</li><li>• Software: Windows, Linux</li></ul>	Safeguards the email gateway from spam and other email threats
<b>InterScan Web Security</b>	Software virtual Appliance: VMware, Hyper-V, Software Appliance	Safeguards the web gateway from web threats and includes URL filtering
<b>Mail Server</b>		
<b>ScanMail Suite for Microsoft Exchange</b>	Software: Windows	Blocks spam, malware, and other email threats at the mail server
<b>ScanMail Suite for Lotus Domino</b>	<ul style="list-style-type: none"><li>• Software: Windows, Linux for x86, IBM AIX, IBM i5 OS, Sun</li><li>• Solaris™, Linux on IBM® zSeries, IBM z/OS</li></ul>	Blocks spam, malware, and other email threats at the mail server
<b>File Server</b>		
<b>OfficeScan</b>	Software: Windows <i>VDI support is available as an add-on</i>	Secures Windows servers
<b>ServerProtect for Windows/Novell NetWare</b>	Software: Windows, Novell NetWare, VMware ESX	Secures Windows and NetWare file servers
<b>ServerProtect for Linux</b>	Software: Linux	Secures Linux file servers
<b>Clients</b>		
<b>OfficeScan</b>	Software: Windows <i>VDI support is available as an add-on</i>	Protects Windows clients
<b>Security for Mac</b>	<ul style="list-style-type: none"><li>• Included plug in for OfficeScan: Apple Macintosh</li></ul>	Protects Macintosh clients
<b>Virtual Desktop Infrastructure</b>	<ul style="list-style-type: none"><li>• Included plug in supporting range of hypervisors</li></ul>	Agent-based security for VDI deployments
<b>Vulnerability Protection</b>	<ul style="list-style-type: none"><li>• Software: Windows</li></ul>	Provides proactive HIPS and virtual patching
<b>Centralized Management</b>		
<b>Control Manager</b>	Software: Windows	Centrally manages security
