Get a better view of your IT environment.

The Zones Discovery Services (ZDS) solution leverages a simple, non-intrusive, agentless technology to rapidly inventory all hardware and software assets at every IP address in your IT environment – regardless of operating system. ZDS provides complete analytics for visibility into every endpoint. Plus, deep visibility into the software applications running in your IT environment.

Zones solution architects and systems engineers will map out a strategy for improving the strengths and eliminating any discovered risks. You'll come away with a clear understanding of how prepared your healthcare organization is for infrastructure initiatives such as virtualization, a unified communications rollout, or data center optimization.

Zones Discovery Services benefits:

> **Monthly updates** – Plus, the ability to run your own ad hoc reports on key metrics at any time.

> **Compliance** – ZDS does not access data so there is no negative impact on HIPAA, SOX, and PCI compliance.

> **No hardware to buy** – This SaaS solution runs on your current virtual network or we'll provide hardware.

> **Reduced ITAM demands** – ZDS provides an easy-to-view, web-based portal.

> **Audit assistance** – The ZDS team will alert you to any audit risks, and provide services to prepare for an audit defense.

> **Historic reporting** – Easily access snapshots to track the status of your environment over time.

> **Consultation** – ZDS Subscription includes a monthly, one hour session with Zones focused on planning and management.

> **Security** – ZDS is a tool that uncovers security vulnerabilities, including analysis for rogue or BYOD devices.

> **Software inventory** – Software assess management features eliminate costly surprises and is a way to cope with shadow IT.
