Top reasons to upgrade to Adobe Creative Suite 5.5 Web Premium

ENHANCED **Multiscreen Preview panel**—View website designs as they would appear across desktop computers, tablets, and smartphones within a single, easy-to-use panel in Adobe Dreamweaver CS5.5. Handle custom media queries and efficiently manage multiple CSS files.

NEW **Robust jQuery Mobile support**—Build rich content for devices with support for the jQuery Mobile framework in Dreamweaver CS5.5. Take advantage of mobile templates, contextual code hinting, and the ability to quickly insert objects into a design.

ENHANCED **Expanded platform and device support**—Use Adobe Flash Professional to create content optimized for delivery to multiple screens and reach audiences on the latest Flash Player and Adobe AIR runtimes, as well as on Android, iOS, RIM, webOS, and Adobe Digital Home devices.

NEW **Efficient workflows for multiple screens**—Manage FLA files that target different devices with Flash Professional. Share assets across documents and device targets to efficiently create, test, package, and deploy content across multiple screens.

NEW **Powerful mobile application development**—Build standalone applications targeted at multiple platforms using the new mobile support for ActionScript® projects and Flex projects in Adobe Flash Builder 4.5 Premium Edition. Leverage mobile-ready components optimized for performance and touch input.

NEW **Full designer-developer workflow**—Work collaboratively and confidently on shared Flex based projects with a new bidirectional workflow that allows designers who use Adobe Flash Catalyst CS5.5 to work in parallel with developers who use Adobe Flash Builder 4.5.

NEW **Support for Flash Player 10.2**—Target an expanded set of devices with Adobe Device Central CS5.5, including those that support the latest version of Adobe Flash Player, which is optimized for mobile devices.

NEW **HTML5 emulation and debugging**—Use Adobe Device Central CS5.5 to emulate HTML5 content on supported devices, and take advantage of the latest version of WebKit to profile media queries, video, canvas, and SVG. Enable and disable JavaScript, and get real-size previews.

NEW **Enhanced code snippets handling**—Utilize over 20 new code snippets in Flash Professional CS5.5, including ones for creating mobile and AIR applications, accelerometer use, and multitouch gestures. Use the new pick whip to visually add interactivity with ease.

System requirements

Windows®
- Intel® Pentium® 4 or AMD Athlon® 64 processor
- Microsoft® Windows XP with Service Pack 3; Windows Vista® Home Premium, Business, Ultimate, or Enterprise with Service Pack 1 (Service Pack 2 recommended); or Windows 7
- 1GB of RAM or more recommended
- 9.1GB of available hard-disk space for installation; additional free space required during installation (cannot install on removable flash storage devices)
- 1280x800 display (1280x1024 recommended) with qualified hardware-accelerated OpenGL graphics card, 16-bit color, and 256MB of VRAM
- Some GPU-accelerated features require graphics support for Shader Model 3.0 and OpenGL 2.0
- Some features in Adobe Bridge rely on a DirectX 9–capable graphics card with at least 64MB of VRAM
- DVD-ROM drive compatible with dual-layer DVDs
- Java™ Runtime Environment 1.6 (included)
- Eclipse 3.6.1 required for plug-in installation
- QuickTime 7.6.2 software required for multimedia features
- Adobe Flash Player 10 software required to export SWF files
- Broadband Internet connection required for online services and to validate Subscription Edition (if applicable) on an ongoing basis†

Mac OS
- Multicore Intel processor
- Mac OS X v10.5.8 or v10.6; Mac OS X v10.6 required for Adobe Flash Builder 4.5 Premium and Flash Builder integration with Flash Catalyst and Flash Professional
- 1GB of RAM or more recommended
- 11.2GB of available hard-disk space for installation; additional free space required during installation (cannot install on a volume that uses a case-sensitive file system or on removable flash storage devices)
- 1280x800 display (1280x1024 recommended) with qualified hardware-accelerated OpenGL graphics card, 16-bit color, and 256MB of VRAM
- Some GPU-accelerated features require graphics support for Shader Model 3.0 and OpenGL 2.0
- DVD-ROM drive compatible with dual-layer DVDs
- Java Runtime Environment 1.6
- Eclipse 3.6.1 Cocoa version required for plug-in installation
- QuickTime 7.6.2 software required for multimedia features
- Adobe Flash Player 10 software required to export SWF files
- Broadband Internet connection required for online services and to validate Subscription Edition (if applicable) on an ongoing basis†
