

Adobe® ColdFusion® Builder™ 2

Choose the professional tool for serious developers

Adobe ColdFusion Builder 2 software is the only professional IDE for quickly and easily building ColdFusion applications. Customize your work environment to improve workflow, and easily expand functionality with extensions written in CFML.

ColdFusion Builder 2 and ColdFusion 9 Enterprise edition

Consider Adobe ColdFusion 9 Enterprise edition software, which, when combined with ColdFusion Builder 2, provides an end-to-end set of tools and services that enables you to rapidly and efficiently build, deploy, and maintain robust Internet applications.

Top reasons to upgrade to Adobe ColdFusion Builder 2

NEW Smart Tab Assist—Quickly navigate to the next logical tag, function, or control statement within your code using keyboard shortcuts.

NEW Advanced Find and Replace—Easily search your application for specific tags, attributes, and text, regardless of file location. Also, use regular expressions for more complex text searches.

NEW Quick Fix—Speed up development by accessing methods within a ColdFusion component (CFC) that have not yet been created, and request that ColdFusion Builder automatically generate the method outline for you.

NEW Customizable keyboard shortcuts—Create customized keyboard shortcuts, modify existing shortcuts, and import/export keyboard bindings to access frequent actions in the IDE.

NEW Code formatting—Apply code formatting based on personalized, predefined rules to a project, folder, file, or block of code.

ENHANCED Intelligent code assist—Accelerate application development with intelligent, ordered code assist for CFML, CFScript, HTML, JavaScript, and CSS.

ENHANCED Refactoring—ColdFusion Builder speeds up your CFML application development by automatically restructuring code when you rename a CFC, function, or variable.

NEW Integrated task management—Set TO DO and FIX ME points within your code to quickly identify sections and resume development where you left off.

NEW ColdFusion framework support—Kick-start application development using extensions for your favorite ColdFusion frameworks.

NEW Application start page—Simplify the process of running and debugging applications by indicating a start page that should be executed first.

NEW 64-bit support—Install ColdFusion Builder 2 as a plug-in to any Eclipse 3.6 64-bit environment.

System requirements

Windows*

- 2GHz or faster processor
- Microsoft® Windows XP with Service Pack 3, Windows Vista® Ultimate or Enterprise, or Windows 7
- 1GB of RAM (2GB recommended)
- 1.5 GB of available hard-disk space (2GB recommended)
- Java™ Virtual Machine: Oracle JRE 1.6 (32-bit JVM for 32-bit Eclipse and 64-bit JVM for 64-bit Eclipse)
- DVD-ROM drive
- Eclipse 3.6.2, 32 bit or 64 bit (for plug-in installation)

Mac OS

- Intel® processor
- Mac OS X v10.6
- 1GB of RAM (2GB recommended)
- 1.5 GB of available hard-disk space (2GB recommended)
- Java Virtual Machine: Oracle JRE 1.6
- DVD-ROM drive
- Eclipse 3.6.2 Cocoa version, 32 bit or 64 bit (for plug-in installation)

The continuing evolution of creative power from Adobe

Develop, test, and deploy ColdFusion applications faster than ever with new features in ColdFusion Builder 2 that improve productivity, control, and extensibility. Work more efficiently with enhanced coding tools, advanced code refactoring, code formatting, custom keyboard shortcuts, and more. Take advantage of more robust extensibility with new extensible code insight and ColdFusion framework support.
