The Largest Enterprise Mobility Management Provider

AirWatch® is the global leader in enterprise-grade mobility solutions across every industry, every device, and every size deployment. AirWatch deploys, secures, monitors and manages Android™, Apple® iOS, Mac® OS X, BlackBerry®, Symbian™, Windows Mobile® and Windows® Phone devices. Our scalable solution grows with your organization, integrates with existing enterprise systems and allows you to manage all devices, regardless of type, platform or ownership, from one central console.

Mobile Security

Security is at the core of every AirWatch solution. Ensure your enterprise mobility deployment is secure and that corporate data is protected with end-to-end security that extends to users, devices, applications, content, data, email and networks.

Mobile Device Management

AirWatch allows you to gain visibility over the devices connecting to your enterprise network, content and resources. Quickly enroll devices in your enterprise environment, configure and update device settings over-the-air and enforce security policies and compliance across your entire device fleet.

Mobile Application Management

AirWatch enables you to manage internal, public and purchased apps across devices enrolled in your organization. Distribute, update, track and recommend apps over-the-air with the Enterprise App Catalog. Build custom internal apps with the AirWatch Software Development Kit (SDK), or wrap existing internal applications for advanced security.

Mobile Content Management

AirWatch secures document distribution and mobile access to corporate content anytime, anywhere in our Secure Content Locker™. Store your corporate documents, email attachments and more in a secure container and protect sensitive files with user authentication, file encryption, geofencing, sharing limitations and offline viewing restrictions.

Mobile Email Management

AirWatch integrates with your existing email infrastructure to deliver comprehensive security for mobile email. Control device access to corporate email, utilize our email access gateway and encrypt sensitive data to prevent data loss. Open email attachments in our Secure Content Locker to maximize data loss prevention.

Bring Your Own Device (BYOD)

AirWatch provides unprecedented choices over the types of devices you deploy, without compromising security. Our flexible model can support corporate-owned, employee-owned and shared devices. Centrally manage all devices, protect users' privacy, allow users basic administration of their devices and secure your corporate data.

Company Differentiators

- The largest MDM provider, largest R&D staff and 1,200+ employees
- Trusted by thousands of global, security-focused organizations
- Recognized as the world's leader in enterprise mobility
