

EVault Endpoint Protection—Summary

Key Benefits

- Empower IT with mobile data oversight enabled through central policy controls
- Lock down endpoint data using advanced security features
- Ensure reliable, worry-free remote data backup
- Maximize user productivity; includes self-service recovery
- Customize your hosting environment
 - EVault/Azure Cloud
 - EVault partner cloud
 - Your own onsite vault or cloud
 - Onsite/offsite hybrid
 - ROBO with local storage

Control mobile data enterprisewide with the all-in-one laptop backup, recovery, and data security solution.

EVault[®] Endpoint Protection offers all-in-one backup, recovery, and data security to control data across your enterprisewide mobile workforce. With automated backup to the EVault/Azure cloud—and other flexible hosting options—granular policy management and advanced security, EVault Endpoint Protection makes mobile data protection easy and safe for IT and end users. Now you can get all the productivity gains enabled by today's enterprise mobility.

All-In-One Solution Lowers TCO, Enhances Adoption: Great for IT, the Company and the User

Mobile devices have transformed your organization. Now, to increase productivity and ensure security, you need a single enterprise endpoint solution that manages remote data flow, improves remote data access, and minimizes data leakage.

EVault Endpoint Protection gives you a central console for controlling a full range of integrated policies. Manage multiple organizational layers and user groups. Configure retentions to include up-to-the-minute backups, multiple retention versions per user or group, and various bandwidth options; these can be managed by the IT administrator or delegated to specific users or groups. Backup data is automatically transferred through optimized processes: bandwidth throttled, compressed, encrypted, and globally deduplicated. Advanced security features enable you to wipe and lock down remote mobile data.

Choose among several hosting environments. The EVault cloud is hosted on the Azure infrastructure and managed by the EVault team of data protection experts. These highly resilient, SSAE 16-compliant, and ISO-certified data centers provide geo-redundant storage with a 99.9-percent uptime. Or host the solution in your own onsite vault or cloud, or in an EVault cloud-connected™ (onsite/offsite hybrid) deployment. You can even add local storage to complement cloud replication for data transfer flexibility, reduced bandwidth costs, and faster recovery.

Data Breach Numbers

Consider these sobering numbers from the Ponemon Institute (2011).

- Average cost of a single data breach: \$5.5M
- Percentage of laptops stolen: 10% (three-quarters of missing laptops disappear at work or at conferences)
- Percentage of data breach victims (customers) who cut ties with the offending organization: 20%

Datasheet

EVault Endpoint Protection—Summary

Operating Systems

- Windows Vista, XP, 7, 8

- Mac OS (Mac OS encryption)

Mobile Access Platforms

- Android, Apple iOS, Windows 8

Languages Supported

- English, French, German and Spanish

Minimum System Requirements

- CPU: Pentium III 1 GHz
- Memory: 1 GB RAM
- Disk space: 1 GB free

Microsoft Azure Certifications and Attestations

Secure, geo-redundant, Tier 4 data centers

- ISO/IEC 27001:2005
- SSAE 16/ISAE 3402
- HIPAA/HITECH
- PCI data security standard
- FISMA
- Various state, federal, and international privacy laws including 95/46/EC (EU data protection directive) and CA SB1386

Great for IT: More Oversight, Less Overhead

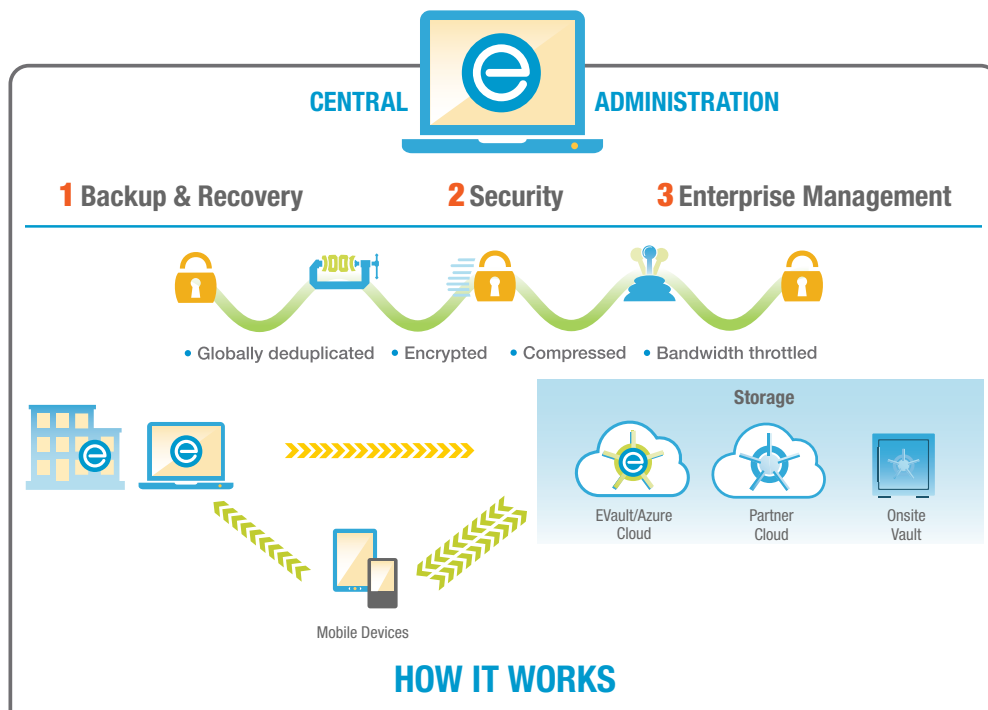

- Centralized, policy-based administration makes it easy on IT staff
- Deduplication and incremental, block-level backups make it easy on your network
- Cloud deployment makes it easy on your infrastructure

Great for the Company: Lock Down Endpoint Data to Avoid Data Leakage

- Powerful, government-grade 256-bit encryption
- Remote data wipe and device tracing
- Port access controls to ensure safe data handling
- Secure, geo-redundant Tier 4 data center hosting options

Great for Users: Worry-free Backup, Self-Service Recovery for Unimpeded Productivity

- Silent, non-disruptive backups
- Easy interface for self-service recovery—no Help Desk support required
- Policy controlled remote access from anywhere
