

EVault SaaS

Key Benefits

- Easy, automatic data protection
- Secure and reliable
- No capital expense or IT staff
- Ensured disaster recovery
- Centralized management
- Easy regulatory compliance
- Broad platform support
- Expert help 24/7

A range of professional-grade, automated online data protection services.

EVault[®] SaaS provides secure, reliable, efficient protection of your organization's critical data, directly through the Internet, so you can safeguard your data without additional capital or IT expenses. It automatically backs up desktop, laptop and server data from across your organization. You configure your desired retention schedule and monitor your backups via a web browser. Your data is deduplicated, compressed, encrypted, and then transmitted to one of our top-tier data centers. With EVault SaaS, you know that your data is protected by industry experts, according to the highest standards of security and reliability. And it's all at your fingertips whenever you need it.

How It Works

EVault SaaS centralizes the backup and recovery of data on all computers distributed throughout your organization—headquarters, remote and branch office (ROBO) locations, and even laptops. Agents automatically back up your data over the Internet to a highly secure data center. You monitor and manage everything within a web browser. Recovery is just as easy: when you need to restore data, simply navigate to the recovery point via an intuitive interface, then click. EVault Reports provide details about the status of your backups.

Secure, Reliable Data Protection Infrastructure

- Our lights are always on, managing petabytes of data in multiple state-of-the-art data centers. This ensures that your data is stored at the highest level of classifications for data center reliability and performance.
- Independent SSAE 16-compliant audits, completed every year, guarantee our facilities and processes conform to industry standards.
- FIPS-approved AES encryption locks your data before it leaves your computer, and ensures that only you have the key to unlock it.

Easy Deployment and Management

- Social platform portal delivers real-time collaboration.
- Our technical specialists can help you set up even the most complex backup schedule in short order.

Datasheet EVault SaaS

Broad Platform and Application Support

- Platform support:
Microsoft Windows,
Novell NetWare, Linux,
Sun Solaris, HP-UX,
IBM AIX, IBM i, and
VMware
- Application support:
Microsoft Exchange,
Microsoft SQL Server,
Microsoft SharePoint,
Microsoft Cluster
Services, Oracle, and
other applications

- Customizable views and simple task delegation speed operations.
- Hot backups support 24/7 operations by backing up mission-critical applications while they are online.

Ensured Compliance with Data Protection Policies and Regulations

- Flexible retention scheduling helps you satisfy internal and external requirements.
- EVault Reports provide instant, centralized, and accurate information about your entire backup and recovery process.

Optimized Performance with Advanced Compression and Data Deduplication

- Front-end data deduplication relies on EVault's delta block-level processing technology, which ensures that only new and changed blocks of data within files are sent to storage, decreasing backup times and reducing storage footprints.
- Back-end data deduplication streamlines storage by eliminating redundant blocks of data within backup jobs, further decreasing storage footprints without compromising performance and scalability.
- Compression technology and bandwidth throttling maximize backup transfer speed and reduce impact on productivity.

Multiple Options for Data Recovery

- Lose your files and folders? Point and click to recover over the Internet.
- Need LAN-speed backup and restore for remote and branch offices? The EVault Express Recovery Appliance provides the best of both worlds—local and offsite backups. You back up to an onsite vault that automatically replicates data to an offsite disaster recovery vault.
- Need a lot of data restored in a hurry? With EVault Premium Data Transfer Services, we'll ship you a hardware appliance loaded with your data.
- Entire site down due to natural disaster? EVault Remote Disaster Recovery Service recreates critical servers in your environment in just hours.
- Looking for a bare metal restore solution? EVault System Restore enables you to quickly recover an unusable system after catastrophic failure onto similar hardware, dissimilar hardware, or a virtual machine—in minutes.

World-Class Customer Support

- Our highly trained experts are available 24 x 7.
- EVault Professional Services teams can help you design, test and execute your data protection strategy.
