

AVG[®] Email Archive

When an efficient, accessible email system is this simple...

Why complicate?

Your customers want an email system that is accessible 24-7 and that can be easily searched by individual users while minimizing costly onsite visits.

AVG Email Archive is a simple, secure, cloud-based solution that integrates seamlessly with your customers' existing email infrastructure. It automatically routes all incoming, outgoing and internal email through the AVG Email Archive gateway, so every message can be safely stored, searched for and recovered to individual desktops 24-7.

Email continuity

Continuous, on-demand access to email from any location. Even with internal network or server outages, your customers can still communicate via email through secure access to the cloud from any browser.

Make more money

Tap into the revenue potential of this vital, high-demand service. As an AVG Partner, you also get exclusive pricing and additional discount opportunities. Plus, you can further increase your revenue by selling our other AVG Email Security services. All with the added benefit of reducing the need for costly on-site visits.

Save time and costs

Fewer email outages, fewer drains on customer network capacity and all delivered without the need for additional hardware, customer-side software or additional IT support mean you can reduce IT expenses for your customers while making more money. Like all AVG CloudCare services, AVG Email Archive is easy to activate with one click saving you time and money at multiple end points.

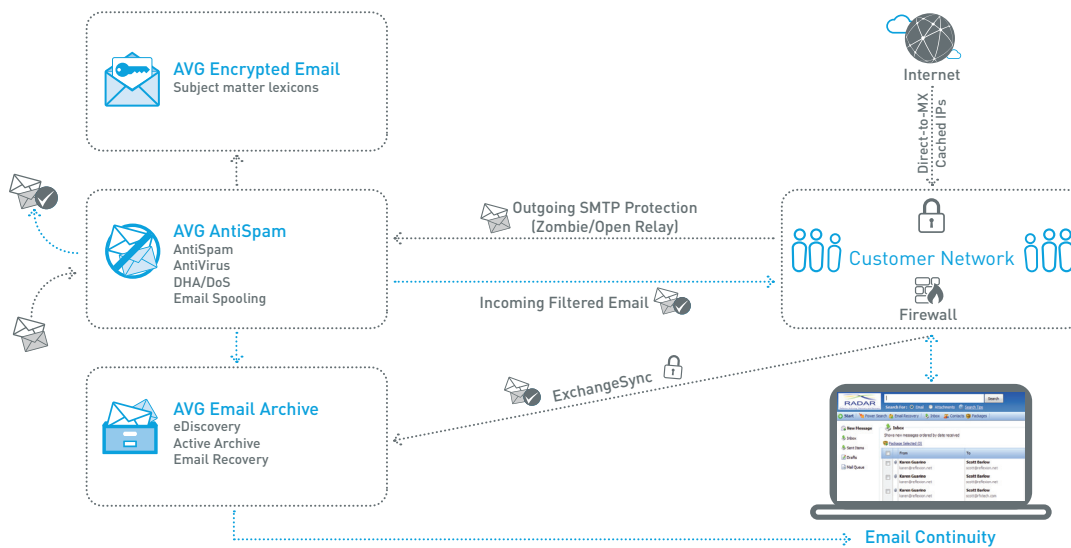

Build your reputation

Reinforces your reputation as a problem solver. Not only can you offer your customers a 24-7 email system that is always accessible, you can also allow individuals to search, access and recover any email information from the archive. The easy-to-use online interface of AVG Email Archive enables users to search and retrieve emails without your help, which frees up your IT team.

Searchable, accessible and protected

AVG Email Archive is the simplest way to offer your customers email continuity, no matter what happens at their local network level. Routing all internal and external communication through the cloud means all information is accessible 24-7 from any browser connection.

Features

Protected, Long-Term Storage

All inbound, outbound and internal email communication is routed through the AVG Email Archive gateway. It is filtered for spam and viruses, which are then removed and the messages are indexed and encrypted.

Active Archiving

Email is used constantly both as a communication tool and information repository, so email storage needs to be more dynamic than regular files and folders. AVG Email Archive active archiving automatically stores a copy of all incoming, outgoing and internal email in a secure, encrypted repository.

eDiscovery

A unique set of eDiscovery tools allow users to search any email or attachment within the email archive on multiple levels. The eDiscovery engine makes it a quick and simple task for individuals to find, access and recover the emails or information they need from the archive direct to their desktop.

Email Continuity

Users can access any email in the active archive on demand from wherever they are in the world with an Internet connection. In the event of internal network or server outages, email communication continues uninterrupted via the AVG Email Archive secure servers.

Reduced Customer Costs

Not only can AVG Email Archive be integrated into your customers' existing email infrastructure without the need for any expense of additional hardware or customer-side software, but it also reduces the need and expense of in-house IT support to monitor and manage the business email system. AVG Email Archive reduces costly onsite visits.

Partner Features

Branding

All customer-facing elements of Message Center are fully brandable.

Co-administration

Use the Message Center to set-up and manage new customers.

Maximum Configurability

Enjoy the highest level of flexibility to be able to respond to customers' needs.

AVG Email Archive Lite

Convenient, Short-Term Storage

Improve your customers' network performance with secure archive storage of all emails on a rolling 60-day basis that users can search, access and recover without the need to contact you. After 60 days, the emails and information are automatically deleted.
