AVG CloudCare™ Services

Complementary Security Services from AVG®.

Protecting the network, data and users is critical to any organization but can often present a number of challenges. As well as ensuring that all the implemented services work seamlessly together, you can find yourself managing multiple administration interfaces, alerting methods and update procedures not to mention the additional work that can arise from dealing with multiple suppliers.

AVG CloudCare™ services are integrated with AVG Managed Workplace (MW). Monitoring, alerting basic remediation is managed within the MW Administration interface, while more detailed activities are available via a single click.

In addition to providing core protection for your organization, because these services are developed and delivered by AVG your invoicing, administration and support is delivered from a single source to minimize your overheads and ensure a consistently high quality experience.

Benefits

AVG CloudCare™ delivers a range of benefits, including;

- **Manage** your network security from a single administration interface.

- **Monitor** your network's security with proactive alerting to highlight when issues occur.

- **Protect** your organization with AVG's award winning security.

- **Secure** your business critical data with automated backups that can be tailored to your requirements.

- **Improve** end user producitivity by protecting users while they're online and implementing Acceptable Usage Policies during office hours.

- **Reduce** Administration by deploying a range of services from a single supplier.

AVG CloudCare Services
