

**Good****GOOD CONNECT™**

## THE CHALLENGE

Truth is, employees in today's fast-paced world want instant communication with their colleagues while mobile. Companies know it and want to encourage real-time collaboration and improve employee productivity, but security and compliance concerns often prevent the use of mobile instant messaging on market-leading devices. Current enterprise instant messaging apps are unencrypted, vulnerable to potential data loss, and expose the corporate network to unnecessary risk. Good Connect, a collaboration-enabling solution from the leader in mobile security, solves these concerns by routing instant messages safely – from behind the firewall, to mobile devices – without compromising your business information or network. And it's designed for use on today's hottest devices, so it lets your employees connect and collaborate on the smartphones they want to use.

## THE SOLUTION

### Provide Unparalleled Security

Unlike other instant messaging products, Good Connect delivers a secure instant messaging platform that protects corporate data at the application level. It leverages FIPS-certified AES encryption libraries, providing an additional layer of defense against malware-infected applications. Application policies, such as password requirements, remote lock and wipe, and prevent cut/copy/paste, safeguard corporate contact and message data within a secure container. Good's container-based approach ensures corporate data is protected while maintaining employee privacy.

Good Connect also protects the corporate network by running everything through Good Technology's secure Network Operations Center (NOC). No VPN connections required. No need to open additional firewall holes. No servers in the DMZ.

### Boost Employee Productivity

By using Good Connect, you can boost mobile employees' productivity and provide greater value to your organization. Employees can track their colleagues' availability, initiate or receive an instant message, make a phone call, share and open file links in Good Share or send an email securely via Good for Enterprise™. Best of all, Good Connect lets you effectively embrace BYOD programs without compromising corporate security or employee privacy.

### Maximize Your Investment

Good Connect is part of Good Technology's Collaboration suite, giving you a complete enterprise mobility solution. Using Good Connect with Good for Enterprise and Good Share you can ensure end-to-end communication security while further boosting mobile employee productivity.

## FEATURES

Good Connect extends enterprise instant messaging to popular mobile devices without compromising security:

- Protect data at rest through FIPS-certified AES encryption
- Prevent data loss and meet regulatory requirements through app policies
- Protect your corporate network with a NOC-based architecture
- Keep track of colleagues' availability to speed collaboration
- Set presence status
- Send and receive instant messages
- Ability to resend an undelivered message
- View and manage instant message history, even in offline mode
- Manage contact lists and groups
- Find co-workers via Global Address List (GAL) look-up
- Receive alerts for new instant messages
- Send secure email when used with Good for Enterprise
- Share and open Good Share file links
