

HP Printing with the environment in mind—reimagine what's possible.

GLOBAL 100

ZONES

HP printing products help you save money and conserve energy, without sacrificing features or performance.^{1,2}

We offer a full lineup of energy-efficient printers, as well as paper products with recycled content and fiber sourced from responsibly managed forests.

Spur sustainable performance and realize the true power of printing.

Choose HP printing products today for energy efficient solutions.

¹Since 2010, energy consumption of our LaserJet portfolio decreased by 56% on average. The average energy consumption (based on ENERGY STAR® program's Typical Electricity Consumption (TEC)) of HP products was estimated annually between 2010 and 2015 using high-volume product lines (including HP LaserJet and excluding scanners) that are representative of the overall shipped product volume.

²Since 2010, HP has reduced energy consumption of our HP InkJet portfolio by 20% on average. The average energy consumption (based on sleep mode power) of HP products was estimated annually between 2010 and 2015 using high-volume inkjet printer product lines representative of the overall shipped product volume. This excludes HP PageWide inkjet printers and HP large format printers.
