

Secure, Convenient and Eco-Friendly

Don't spend valuable time sorting through all your organization's different e-waste and finding a responsible place for each type of item. Zones professional services makes disposal and recycling of your organization's e-waste – anything from CDs and batteries to computers and obsolete equipment – easy and secure.

Time savings. You don't have to go looking for responsible ways to dispose of each type of e-waste. We make it easy and take it all!

Secure destruction and full accountability. All information is destroyed and the materials are recycled – with a fully documented audit.

Environmentally friendly. Zones has developed leveraged relationships with Approved Service Providers who follow best practices during disposal and recycling to protect the environment.

E-Waste Collection Services

Collection boxes specially made for easy disposal of e-waste are available in multiple sizes and use a minimal amount of floor space. The e-waste collected includes all of the various spent supplies and obsolete accessories associated with technology:

- > CDs, diskettes, audio and video tapes
- > Old cell phones, pagers and PDAs
- > Inkjet, laser printer and fax cartridges
- > Rechargeable batteries and much more

Use the collection boxes in one office or distribute them throughout your organization or campus... it works the same both ways. The boxes will be picked up and securely transferred to a Zones approved service provider for auditing and processing. All devices and information are safely destroyed and the material is consolidated and shipped to the appropriate certified recycler. When the process is complete, you receive a certified audit that includes date, recycle destination and other service information.

Smart Ideas for Greening Your Infrastructure

Virtually every new component in the modern IT infrastructure is more energy efficient than its predecessor, delivering lower operating and cooling costs. While a complete IT overhaul might yield tremendous energy savings, it also comes with a significant up-front costs. Zones consultants can help you understand your current energy consumption and chart a phased, cost-effective path toward a more efficient IT environment.

- > **Energy Audit:** Identifies your worst offenders and provides economical alternatives.
- > **Virtualization:** Trims your energy footprint 50-80 percent in a significantly reduced physical footprint.
- > **Data Center Refurbishment:** Save energy with upgraded hardware and smart, low-cost strategies for more efficient power and cooling.

Start e-waste collection services or take steps to green your IT infrastructure by calling Zones.
