

Optimize your printing infrastructure & lower costs

Zones Managed Print Solutions brings greater efficiencies to document management practices by helping IT administrators manage the print environment, optimize the printing infrastructure, and improve workflows.

Management of the print environment helps ensure maximum device performance, simplifies consumables replenishment, and reduces downtime. Optimizing an infrastructure allows IT managers to get the right devices in the right locations, helping to reduce costs and improve worker productivity. And, a business can evolve from inefficient, paper-based processes to automated workflows.

Increase the value of a printing infrastructure

With devices of all ages, from a variety of different hardware manufacturers, managing the devices themselves becomes a big challenge. Designed to benefit every part of business, Zones Managed Print Solutions relieve the print management burden.

By auditing a current imaging and printing environment – to see true costs and how devices are being used – Zones helps businesses develop a strategy that intelligently distributes devices to drive better resource usage. Evaluating information gathered through Zones Managed Print Solutions enables a business to use existing devices where beneficial, retire legacy devices responsibly, and gain new efficiencies from the latest technology through placement of new devices. Management reporting can also help a business satisfy green initiatives by managing printers more efficiently, purchasing new environmentally-friendly devices, and using existing devices with energy savings in mind.

Zones has been delivering imaging and printing solutions for 25 years. We can handle even the most complex, multi-vendor print environments, high-level security requirements, and extensive document workflows.

Benefits of Zones Managed Print Solutions:

- > Manage multiple brands and models with a single solution
- > View real-time status of printers 24/7
- > Accurately measure and attribute costs through real-time reporting
- > Receive automatic shipments of printer supplies routed to specific devices
- > Maintains uptime through device troubleshooting and national on-site support
- > Analyze workload trends and device efficiency

As always, with Zones, you will have a trusted single point of contact to help you manage and oversee your unique print management infrastructure.

THE ZONES DIFFERENCE IS YOUR ADVANTAGE

- > Consult with Zones' trained and certified engineers
- > Apply Zones business insights to solve print and imaging challenges with innovative solutions
- > Choose one source for all hardware, software and management tools
- > Increase efficiencies and lower costs through Zones Managed Print Solutions
- > Leverage Zones' relationships with leading partners – HP, Cisco, IBM, Microsoft, Symantec, McAfee, VMware and more
