# ADOBE® ACROBAT® CONNECT™ PROFESSIONAL COMMUNICATE AND COLLABORATE INSTANTLY THROUGH SCALABLE, INTERACTIVE WEB CONFERENCING

Adobe Acrobat Connect Professional software brings real-world functionality to web conferencing. It enables business users to communicate and interact with groups large and small in real time, using high-impact presentations and essential collaboration tools, including screen sharing, multiperson video, and whiteboarding.

With Acrobat Connect Professional, you can:

- Deliver rich, flexible, and hassle-free online meetings
- Help reduce expenses and accelerate productivity through ad hoc discussions and instant online collaborations
- Engage colleagues and customers with rich multimedia content
- Manage and control online meetings and assets through robust meeting management and reporting tools
- Customize and brand personal meeting rooms to suit your specific needs
- Communicate and collaborate more effectively with small and extended teams

Instantly communicate and collaborate with virtually anyone

Interact with remote colleagues and customers in real time—one on one or in extended teams. Acrobat Connect Professional online personal meetings are delivered by ubiquitous Adobe Flash® Player, already installed on more than 97% of Internet-connected desktops worldwide, so your audience can access them instantly, without cumbersome software downloads. And, your personal meeting room URL is customizable, so it's easy to remember for you and your contacts—make it an indispensable part of your e-mail signatures and business cards, just like your phone number and e-mail address.

Help reduce expenses and boost productivity

Acrobat Connect Professional online personal meetings with audio conferencing, VoIP, and multiperson video help reduce travel and accelerate productivity. Participants can collaborate in an informal, highly interactive manner with shared screens, applications, images, and documents. The simple, intuitive application user interface also includes whiteboarding, a convenient notepad window for capturing meeting notes, and a chat window that enables participants to share thoughts without interrupting the meeting.

Engage participants with rich media content

Don't just talk to your audience; engage them with rich, interactive multimedia experiences. Acrobat Connect Professional supports the presentation of rich media content, including video, animations, and software simulations in addition to the ability to record meetings for later on-demand viewing.

Streamline and customize online meetings

Focus on your agenda, not your computer. Acrobat Connect Professional provides an intuitive, tab-based interface to help you quickly set up and organize your workflow and content. It also makes it a snap to apply company logos and colors to login screens and meeting room layouts. In addition, the application automatically saves meeting room layouts and contents to a searchable content library, so you can launch right into follow-up meetings. For recurring meetings, you can further minimize setup time by saving custom meeting rooms, complete with content, as templates.

System requirements

Host and participant

Microsoft® Windows® 98 SE/2000/XP Home/Professional
- Internet Explorer 5.0 or later
- Netscape 7.1 or later
- Mozilla Firefox 1.5 or later

Mac OS X v.10.2/10.3/10.4
- Safari 1.1 or later
- Mozilla Firefox 1.5 or later

Additional requirements

Participants:
- Macromedia® Flash Player 6.0.79 or later
- Broadband connection

Hosts:
- Flash Player 6.0.79 or later

Adobe Acrobat Connect Collaboration Builder SDK

To develop applications for use with Acrobat Connect Professional, you must install the Collaboration Builder MXP plug-in for Macromedia Flash MX 2004 or Flash 8. The Collaboration Builder SDK system requirements are the same as the requirements for Flash MX 2004 or Flash 8.

Features and benefits

Instant access to online meetings
Leverage ubiquitous Flash Player for instant, hassle-free access to Acrobat Connect Professional meetings for virtually anyone, anywhere.

Custom URLs
Create personalized URLs that are easy to remember.

Easy screen sharing
Share your screen for collaborative work sessions with colleagues or one-on-one meetings with customers at the click of a button.

Always-on meeting rooms
Open your meeting room URL and your online meeting is good to go—no scheduling or setup required.

Audio conference call control
Control reservationless audio conference calls from one easy-to-use interface—dial out to participants, mute and put participants on hold, and view the active speaker.

Unique support for rich content
Engage small and large audiences with video, animations, and software simulations and record meetings and live events for later on-demand viewing.

Meeting recording
Conveniently record live meetings for associates and team members who are unable to attend due to travel, time, or other con-straints.

Easy file sharing
Invite participants to upload and share documents from within the meeting environment.

Engaging meeting experience
Conduct cost-effective, lively virtual meetings, using data sharing and voice communications with VoIP and multiperson video conferencing.

Moderated Q&A
Conduct chat-based Q&A sessions with complete control over question queue, visibility, and question delegation.

Indispensable collaboration tools
Call attention to details—annotate over screen sharing, featured content, and blank white-boards using standard tools or your own custom annotation shapes.

Real-time polling
Poll attendees to collect real-time feedback on your meeting.

Essential meeting management tools
Manage and control online meetings and assets, and run reports on the effectiveness of meetings.

Persistent, searchable content library
Easily store, retrieve, and share meeting room templates and other assets with colleagues across your organization.

Flexible meeting rooms
Customize the look and feel of meetings and events to reflect your corporate branding.

Collaboration Builder SDK
Leverage the skills of the Flash community to extend the functionality of your meeting rooms with custom applications.
