

Certainty in a Connected World... Even Outside the Data Center

Life Is On

In today's changing IT landscape, you need compute and storage outside of the data center. But you also need data center-like resiliency in these edge environments.

APC by Schneider Electric makes it easy. Add any of these products and services to ANY manufacturer's rack or enclosure to create an efficient, robust edge solution.

UPS

Intelligent and efficient network power protection

Power Distribution

Real-time remote monitoring of connected loads

Security and Environmental Monitoring

Environmental threat protection for all types and sizes of IT environments

Rack Accessories, Monitors, and Switches

Rack components and accessories to organize equipment and improve efficiency

Containment

Rack-based air removal systems to help keep IT equipment from overheating

Manageability

Secure, remote visibility of all edge data centers through a single pane of glass

Services

A full range of services and support to minimize downtime

UPS

The Smart-UPS™ family provides intelligent and efficient network power protection.

- **Network Management Card:** Integrated for remote management on all models 5kVA and above, optional on models below 5kVA.
- **Power Chute Management Software:** Proactive UPS management, safe system shutdown, and innovative energy management capabilities.
- **Connected Smart-UPS with APC SmartConnect:** Securely and remotely monitor UPS systems from any internet-connected device and proactively receive actionable alerts, firmware updates, and advanced support.
- **MSP Integration:** Download an integration kit for Kaseya, AVG, or SolarWinds N-Able to monitor single phase Smart-UPS units with network management cards, or integrate Smart-UPS with APC SmartConnect through Kaseya or ConnectWise Automate.

Power Distribution

- **Metered Rack Power Distribution Unit (PDU):** Provides real-time remote monitoring of connected loads.
- **Switched Rack Power Distribution Unit (PDU):** Provides the above, plus remote on/off switching control of individual outlets for power cycling, delayed power sequencing, and outlet use management.
- **Configure-to-Order PDU Architecture:** Design the PDU solution that fits your business with streamlined processes, competitive pricing, and fast turnaround.

Security and Environmental Monitoring

- **NetBotz:** Environmental threat protection with EcoStruxure IT Expert integration and user-defined alerts. Entry level (NetBotz 250) to expansive, complete solutions with HD cameras (NetBotz 750 rack-mount, NetBotz 755 wall-mount).

Rack Accessories, Monitors, and Switches

- **Airflow Management:** Improve rack cooling efficiency by preventing air recirculation and reducing bypass airflow.
- **Cable Management:** Organize power or data cables within a rack or enclosure.
- **Mounting Hardware:** Install rack mount IT equipment and secure racks within an enclosure.
- **Rack Components:** Add doors, roofs, side panels, baying kits, casters, and other components when requirements change.
- **Network Connectivity:** Connect it with RJ45 connectors for Cat 5e/Cat 6/Cat 6A performance, patch panels, copper LAN cables and patch cords, and pre-terminated fiber optic solutions.
- **LCD Monitors and KVM Switches:** Manage multiple servers from a single location with rack LCD consoles, KVM switches, and Ethernet switches.

Containment

- **Rack Air Distribution:** Rack-based air removal products that are integrated in or on individual rack enclosures.
- **Rack Air Containment:** Capture and return hot exhaust air to perimeter via the low-cost, easy-to-install Vertical Exhaust Duct (VED) System.

Manageability

- **Cloud- and IoT-enabled EcoStruxure IT:** Get global, vendor-neutral visibility, monitoring and insights across your hybrid environment with a subscription and one-tap smartphone access.

Services

- **Extended Warranties:** Extend factory warranty beyond its original term.
- **Monitoring Services:** Proactively minimize downtime and reduce break-fix resolution time with digital remote monitoring services.
- **Battery Replacement Services:** Properly service and replace batteries using certified service professionals.
- **Preventative Maintenance:** Regular on-site care and maintenance performed by specially trained APC by Schneider Electric staff.
