

Transform your SharePoint

Migrate, customize and manage your environment without chaos.

Extend SharePoint beyond content and collaboration by transforming it into the business-critical platform your company and your users need. With Dell Software's SharePoint solutions, you can reduce the risk, time, cost and complexity associated with migrating, customizing and managing SharePoint for both IT and site owners.

Migrations:

- Ensure migration success with solutions for pre-migration assessment and planning.
- Simplify migrations and mitigate risk with one tool that migrates content from SharePoint, Windows files, Google Drive and Exchange public folders to SharePoint and Office 365.
- Maintain incredibly high data fidelity when migrating Lotus Notes applications to SharePoint and Office 365.
- Simplify and automate a seamless migration of your social network data from IBM Connections to SharePoint or Office 365.

Customizations:

- Slash development time and cost by up to 80 percent and maximize your SharePoint ROI using code-free configuration.
- Build sophisticated applications that meet business demand and are easy to support, maintain and upgrade.
- Empower users to make their own customizations safely and with confidence, reducing risk and freeing IT resources.

Management:

- Save time with centralized permissions management, reporting, security and auditing.
- Get lost data back into the hands of users quickly through granular recovery.
- Reduce storage costs by offloading files to external repositories, such as the Dell Fluid File System.
- Increase user adoption of SharePoint for content collaboration and sharing.
