

CA ARCserve® Backup

Go beyond backup, so your business can confidently drive beyond today.

CA ARCSERVE BACKUP GOES BEYOND BACKUP, GIVING SMALL AND MEDIUM-SIZED BUSINESSES HIGHLY RELIABLE DATA PROTECTION WITH CENTRALISED MANAGEMENT THAT NORMALLY ONLY BIG BUSINESS CAN AFFORD. AT A FRACTION OF THE COST.

REDUCE YOUR BACKUP STORAGE BY UP TO 80 PERCENT AND GAIN BACK PRECIOUS TIME WITH THE ONLY PRODUCT THAT COMBINES DATA DEDUPLICATION, GRANULAR RESTORE OF APPLICATIONS LIKE ACTIVE DIRECTORY, EXCHANGE AND SHAREPOINT, AND INFRASTRUCTURE VISUALISATION – FOR BOTH PHYSICAL AND VIRTUAL SERVERS IN A SINGLE PACKAGE.¹

AND IT WORKS NO MATTER HOW COMPLEX YOUR INFRASTRUCTURE IS SO YOUR DATA IS ALWAYS SECURE. SO NOW YOU CAN SPEND YOUR TIME ON MORE PRESSING ISSUES, LIKE GROWING YOUR BUSINESS.

The ARCserve difference

Hundreds of thousands of happy customers worldwide are taking advantage of these industry-leading enterprise-class features:

INTEGRATED DATA DEDUPLICATION Improves the economics of backup and recovery by enabling longer retention periods, providing a cost-effective means of reducing storage, protecting critical data and integrating, configuring and managing data deduplication in the existing backup environment.

INFRASTRUCTURE VISUALISATION Provides an easy-to-read network diagram view of the entire environment including all of the servers, storage and other devices showing how they relate to each other and to the CA ARCserve Backup media server(s). Easy drill down on each component offers status, backup methodology and other key information.

GRANULAR RESTORE OF ACTIVE DIRECTORY Restore individual Active Directory objects from a System State backup without having to reboot the AD Domain Controller. Single System State backup allows for both object level and system level restore saving time.

[¹] As of February 2010.

GRANULAR RESTORES OF SHAREPOINT Enables you to restore individual files, sites and sub-sites within a SharePoint environment for fast recovery. The entire environment can also be restored if required and all types of restoration can be achieved using a single-pass full farm backup.

UNIX/LINUX DATA MOVERS FOR SAN-BASED BACKUPS Provide faster, more efficient backups and restores for databases and file systems on Unix and Linux servers while also providing centralised management, reporting and licensing for all servers via the CA ARCserve Backup Media Server.

GLOBAL DASHBOARD Helps reduce management complexity with worldwide operational monitoring and SRM reporting across all offices from a single location to improve reliability, help ensure compliance with corporate policies and proactively respond to help avoid unplanned downtime. Easy-to-read graphical reports detail environmental status from backups to storage to servers to networks across all offices to help save time and resources.

VIRTUALISE SERVERS WITH CONFIDENCE Incorporate sophisticated backup and recovery functionality into VMware, Microsoft Hyper-V and Citrix XenServer virtualisation technologies – easing management and mitigating the risk of data on virtualised servers.

COMPREHENSIVE PROTECTION Supports Windows, Unix, Linux and Novell environments with DAS, NAS and SAN storage.

The benefits speak for themselves

- **GREAT VALUE:** CA ARCserve Backup is the only product on the market that combines innovative data deduplication, granular restore of applications like Active Directory, Exchange and SharePoint and infrastructure visualisation for both physical and virtual servers in a single, powerful package.
- **SAVE TIME:** CA ARCserve Backup makes monitoring and management simple with centralised and easy-to-use management tools to help ensure the integrity and availability of your most important and strategic business asset – your data.
- **THE BIG PICTURE:** CA ARCserve Backup SRM reporting proactively offers information on the entire environment enabling you to identify performance bottlenecks, resource utilisation and licensing allocation to help ensure system performance levels are maintained.
- **FLEXIBLE DEPLOYMENT:** CA ARCserve Backup is available as individual components, suites based on server type and suites based on capacity to meet your specific needs and purchasing requirements making it easy to buy.
- **AMAZING REVIEWS:** CA ARCserve Backup has been rated by multiple independent reviewers, partners and customers as easy to use with a simple user interface, wizards to ease process, visual reports, environment visualisation via a network diagram, proactive in avoiding problems, works reliability, easy install and your data is quickly restored.
