

WinZip Enterprise

Simplified file encryption. Everywhere your files are.

Industry-leading data cryptography, management, sharing and compression in one powerful, customizable solution.

Protect your IP from threats. Empower your teams for success.

- Enjoy complete information security while enabling the productivity and collaboration that fuel business growth.
- Safely store, manage, and share files within a single application.
- IT can uphold the protocols and standards that keep data and systems safe.

Customize access

Control and standardize information flow

Zip assets seamlessly

Store, send, receive, and open with ease

Collaborate securely

Safely share and manage across platforms

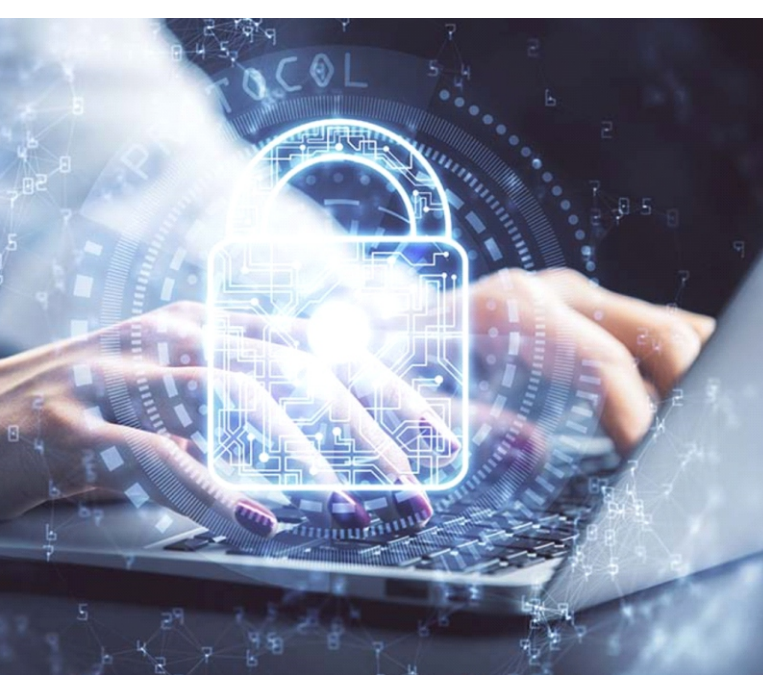

Protect IP completely

Unsurpassed FIPS 140-2 compliant and FIPS 197 certified encryption

Ensure compliance

Cover requirements with powerful IT controls

Security, productivity, and support in one complete solution

Lock down your files like a pro

Unsurpassed bank & military-grade AES encryption compliant with all major standards, including FIPS 140-2, FIPS 197 and trusted for DFARS, ensures ironclad file protection in transit and at rest.

Enable faster, better workflows

Streamlined file sharing, and integrated capabilities shrink lag time and remove friction points.

Customize and scale to fit your business

WinZip Enterprise gives you the tools, flexibility, and licensing options to secure your data, support your teams, and meet business objectives on your terms.

WinZip Enterprise

Trusted by 100,000+ businesses worldwide

Financial services

Best-in-class encryption and compliance

The strongest layer of FIPS 140-2 level encryption defends data against would-be attackers and allows centralized control within the enterprise to ensure data protection at all levels.

Defense, government & military

Simplified administration and data defense

Protect top classified information in transit with next-generation administrative controls and tools, while enabling departments and contractors to meet their obligations on time and on-budget.

Healthcare

Solid protection for sensitive information

Ensure you're meeting all federal government requirements for data protection and encryption, while enjoying the flexibility to serve patients efficiently and safely.

Insurance

Flexible encryption for private data

Encrypt any kind of data, PII or PHI, whether you're a business user or IT admin. Enforceable enterprise-wide standards ensure private client data remains that way without disrupting operations.

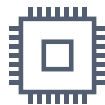

Built for Microsoft Windows, seamlessly integrated with native experience

OS COMPATIBILITY

32-bit and 64-bit versions of:

- Windows 7
- Windows 8
- Windows 10

MINIMUM PROCESSOR

1 gigahertz (GHz) or faster processor

MINIMUM MEMORY

1 gigabyte (GB) for 32-bit or 2 GB for 64-bit

DISK SPACE

235 MB

ADDITIONAL SPECS

- .NET version 3.5
- Minimum web browser version: Internet Explorer 8
- Minimum graphics hardware/ software: DirectX 9 or later with WDDM 1.0 driver
- Minimum display resolution: 800 x 600
