

Microsoft platform management

Migrate, secure and manage your Microsoft infrastructure

Managing and securing Microsoft platforms — such as Active Directory, Exchange, SharePoint, Skype for Business and Office 365 — can be expensive and time-consuming. In fact, organizations typically spend 75 percent of their budget maintaining legacy infrastructure.

It's time to optimize your environment and secure your Microsoft infrastructure to prepare for what's next. Our award-winning solutions help you migrate, manage and secure your data across on-premises, cloud-based and hybrid platforms.

Stop worrying about maintaining systems, and start focusing on innovation. See for yourself why our tools have been used to migrate, secure and manage more than 180 million users.

CAPABILITIES

- **Migration and consolidation** — Ensure a zero-impact migration and consolidation for Microsoft platforms such as Active Directory, Exchange, SharePoint and Office 365. Simplify and automate migration tasks so you can finish the project faster while minimizing the costs, risks and disruptions to users.
- **Security and compliance** — Reduce enterprise risks, maintain policy compliance and adhere to regulations with detailed, real-time assessment, auditing, alerting and remediation of complex Microsoft environments. Identify, track, address and even prevent vital configuration changes in real time — without the overhead of native auditing. Ensure compliance with HIPAA, PCI, SOX, FISMA, GDPR and more with audit-ready reports.

Our award-winning solutions have been used to migrate, secure and manage more than 180 million users across on-premises, cloud-based and hybrid Microsoft platforms.

BENEFITS:

- Deliver fast, seamless and secure migrations and consolidations
- Bolster security and improve compliance
- Quickly back up and recover data
- Diagnose and resolve issues before they impact users
- Simplify data collection, reporting and chargeback generation
- Easily manage and report on users and group permissions
- Get award-winning 24x7 support that provides expertise and practical experience

“Implementation of Change Auditor enabled us to cut the time spent investigating information security incidents related to unauthorized access to data located in our corporate information systems in half.”

Dmytro Pasechnik, Head of Information Security, Dragon Capital

- **Backup and recovery** — Avoid data loss and maintain business continuity with streamlined backup and disaster recovery solutions for Active Directory, Exchange, SharePoint and Office 365. Facilitate efficient searches for fast email discovery. Easily recover lost data from individual objects, permissions, email and files, or perform a full disaster recovery.
- **Performance and availability** — Gain the insight to resolve issues before they affect user productivity by monitoring the performance of Active Directory, Exchange, Skype for Business, SharePoint and Windows Server environments. Conduct real-time diagnostics and problem resolution through simplified consoles. Optimize performance, meet SLAs and maintain compliance and regulations by empowering your organization with the right information.
- **Reporting** — Satisfy management demands for information, dive into usage, adoption and performance, and prepare for upcoming migration and consolidation projects. Automate data collection, reporting and chargeback generation for Microsoft platform environments — including Active Directory, Windows Server, SQL Server, Exchange, SharePoint and Skype for Business — to reduce administrative workloads.
- **Group policy and permissions** — Secure your Windows Server environment and prove compliance. Take advantage of automated solutions for managing and reporting on users and group permissions, along with Group Policy Objects. Get support for Active Directory, Azure Active Directory, Windows Server and NAS filers, Exchange, Office 365, SQL Server, SharePoint, Skype for Business and OneDrive for Business.

GLOBAL SUPPORT AND SERVICES

When you're selecting a software solutions provider, the strength of support, services and the partner community is as important as the quality of the products. We provide global coverage from our experienced professional services team or highly skilled partners who are committed to your satisfaction and who have years of practical experience assisting customers to successfully execute their Microsoft platform management projects. Plus, our 24x7x365 technical support minimizes business risk by providing unrivaled, highly rated support that's earned multiple industry awards.

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple to use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
