Toad Data Point 3.6

Three editions allow you to choose the right product for your business

Simplify data access, integration and reporting with Toad™ Data Point. These powerful, yet easy-to-use data analysis tools automate reporting to let you integrate all of your relational and nonrelational data sources, simplify complex tasks, quickly validate information and easily share analytics with your team — all through one time-saving interface.

Toad Data Point 3.6 is available in three editions — Base Edition, Professional Edition and Professional Edition with Analytics — allowing you to get the best tools for your particular business needs.

- **Toad Data Point Base Edition.** Connects to all your relational databases and simplifies writing ad-hoc SQL queries, enabling you to create datasets faster while more quickly delivering reporting results.

- **Toad Data Point Professional Edition.** Allows you to access and visually build cross-platform queries across all your data. Powerful data provisioning tools enable you to work with large datasets, making data integration, visualization and publishing much easier.

    - **Toad Intelligence Central Add-On for Toad Data Point Professional.** Enables sharing and collaboration across your Toad users. This professional add-on provides a powerful centralized repository for making data provisioning more efficient and accelerates sharing of queries, artifacts and other Toad files right within the tool.

- **Toad Data Point Professional Edition with Analytics.** Provides a complete data analysis solution for power users who need access to all their enterprise data and tools for advanced analytics. This edition includes everything in Toad Data Point Professional Edition, plus a library of over 170 prebuilt algorithms for predictive analytics.

Choose the Toad Data Point edition that's right for you
