

Transform your business to enable remote worker productivity.

Microsoft Teams Rapid Deployment Service.

We are the experts in rapid deployment of Microsoft 365 and Microsoft Teams services. With tens of thousands of accounts migrated in recent years, we have the experience to enable your success. With proper planning, we can deploy thousands of accounts in a single weekend. We know because we have done it. We were on the front lines during the COVID-19 pandemic and were flooded with requests, and we delivered 100% success enablement and satisfaction rates.

Microsoft Teams is the Leader in Collaboration Tools.

Microsoft Teams is the industry leader in collaboration tools. Teams is cloud based, secure, flexible, manageable, and includes easy-to-use features like instant messaging, screen sharing, voice calling, conference calling, a vast third-party app store, security, and so much more.

RAPID DEPLOYMENT SERVICE OPTIONS INCLUDE:

- **Home Device Packages**

We have many popular packages for your work from home users to choose from. These are priced as discounted packages, so you can simply make a choice, and we'll ship directly to your users. We enable your work from home users the right way, right away, for a great experience.

- **Security & Compliance**

Security is the foundation for everything we do. We will evaluate your data protection settings and take the necessary steps to enable a safe and productive remote experience for your users. Compliance is just as important, and Microsoft 365 will ensure compliance with over 100 industry standards. We will help implement these settings for you.

- **User Training**

Your new technology deployment won't be successful unless your users adopt it properly. Our team of certified adoption and change management trainers have developed a proven methodology to quickly train your work from home users. We will enable near instant productivity.

- **Conference and Meeting Services**

Whether you're conducting a meeting in a conference room or remotely, all relevant parties should be included. We will configure your meeting experiences with your users in mind, ensuring first-class collaboration. Zones also contracts to build out your conference rooms to Microsoft Teams specifications and can provide 24x7 managed support services for Microsoft Teams and your conference rooms.
