ESET® Mobile Antivirus

ESET Mobile Antivirus

Smartphones and PocketPCs are enormously popular with consumers and businesses. These mobile devices are used for communication, entertainment and services. As a result, they are warehousing increasingly sensitive information.

This trend is attracting the attention of financially motivated cybercriminals. Analysts agree that mobile devices will become increasingly targeted for attack, putting hundreds of millions of devices at risk to these emerging and unknown threats.
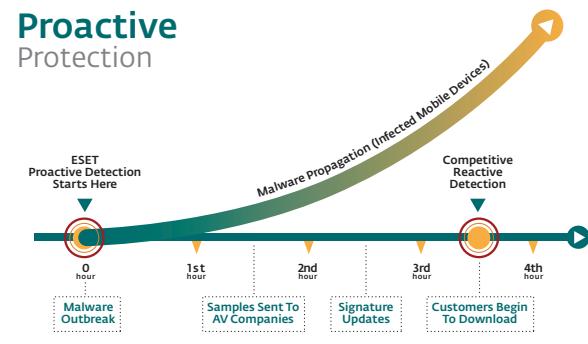

Created by the team that brought you the award-winning ESET NOD32® Antivirus, ESET Mobile Antivirus delivers proactive and comprehensive protection from viruses, spyware, adware, trojans, worms, rootkits, and other potentially unwanted software. As mobile threats evolve, ESET Mobile Antivirus will keep your smartphones and Pocket PCs safe — even between signature updates. Its fast engine keeps your inbox uncluttered by filtering SMS spam from unknown and unwanted senders.

Smartphones and Pocket PCs have greater resource constraints than personal computers. ESET Mobile Antivirus has low CPU, memory requirements and compact updates which minimize data bandwidth usage. It will protect email attachments and other files being transferred or accessed without impacting performance.

Key Benefits

Proactive Protection	Proactively protect against known and unknown mobile malware
Control SMS spam	Send unwanted text messages to the spam folder with simple rules

Proactive
Protection

Malware Propagation (Infected Mobile Devices)

ESET
Proactive Detection
Starts Here

Competitive

Detection

0 hour	1st hour	2nd hour	3rd hour	4th hour
Malware Outbreak	Samples Sent To AV Companies	Signature Updates	Customers Begin To Download	

Features

Heuristics	Proactive protection without relying on signatures
On-Demand Scanning	Scan memory and running processes, onboard files and removable media for malware; search deeply into nested folders to uncover malicious software
Advanced On-Access Scanning	Scans all accessed files for viruses, including email attachments and files accessed via wireless means such as Bluetooth®, WiFi®, infrared, GPRS and EDGE
SMS Spam Filter	Block text messages from unknown senders or use black and white lists to filter your SMS messages
Activity Log	Scan statistics are stored in a user-friendly format. Up to 50 logs can be stored onboard
Variable In-Depth Scanning of CAB Files	Control the scan depth of compressed cabinet files that may contain other nested folders or other compressed files
Automatic/On-Demand Updates	Download signature updates on-demand or automatically at pre-set intervals: daily, weekly, or monthly
Intuitive User Interface	Simple and elegant user experience

Minimal Resource Utilization

- The software consumes about 400 KB installed

Documentation

The product comes with the following documentation:

- Help files
- User Manual

Device Requirements

Operating Systems: Microsoft® Windows Mobile®5.0
Pocket PC Phone/Smartphone Edition

Microsoft Windows Mobile 6.0 Standard/Professional Edition

Microsoft Windows Mobile 6.1 Standard/Professional Edition

Memory: 1 MB
