

## HP Smart Document Scan Software 2.0

Save time, boost productivity, add value

Get the most out of your HP document scanner. HP Smart Document Scan Software, included with your scanner, can help you elevate your business to a higher level of efficiency. This fast, ISIS<sup>®</sup>-based, capture and routing application lets you easily customize options to enhance, manipulate, send, store and print scans. Smart Document Scan Software makes complex tasks simple, so you can accomplish more, faster.

### Let the scanner work for you.

Smart Document Scan Software lets you create dozens of scan profiles with a variety of options such as paper size, resolution, file format, destination and more. You can then assign these profiles to customizable buttons on your scanner for instant execution of your pre-determined functions. Scans become completely automated so you can carry out complex jobs with the touch of a button.

### Select a format to suit your needs.

HP Smart Document Scan Software supports a wide range of file formats to make things easier for you. When you save files as Microsoft<sup>®</sup> Office Word or Excel<sup>®</sup>, Searchable PDF, HTML, or other text files, optical character recognition (OCR) automatically activates to produce fully editable and searchable text.

Save scans as PDF, TIFF or JPEG to easily e-mail or organize files. Or, choose additional PDF formats—PDF/A, a “timeless” format, or PDF-MRC, a highly compressed format—to archive scans.

### Send scans to remote locations right from the scanner.

Smart Document Scan Software makes it easy to save files to a shared drive, on a Microsoft SharePoint<sup>®</sup> portal server, or send to remote locations via file transfer protocol (FTP) or e-mail. A number of third-party applications are integrated out of the box, and Smart Document Scan Software can send scans directly to any application that supports command-line parameters.

### Always get a quality scan.

Kofax<sup>®</sup> VirtualReScan<sup>®</sup> (VRS) works in conjunction with Smart Document Scan Software to help you get clear, readable results regardless of the condition of your original document. It automatically adjusts color and contrast of your scans to produce smaller files, greater detail and improved OCR.

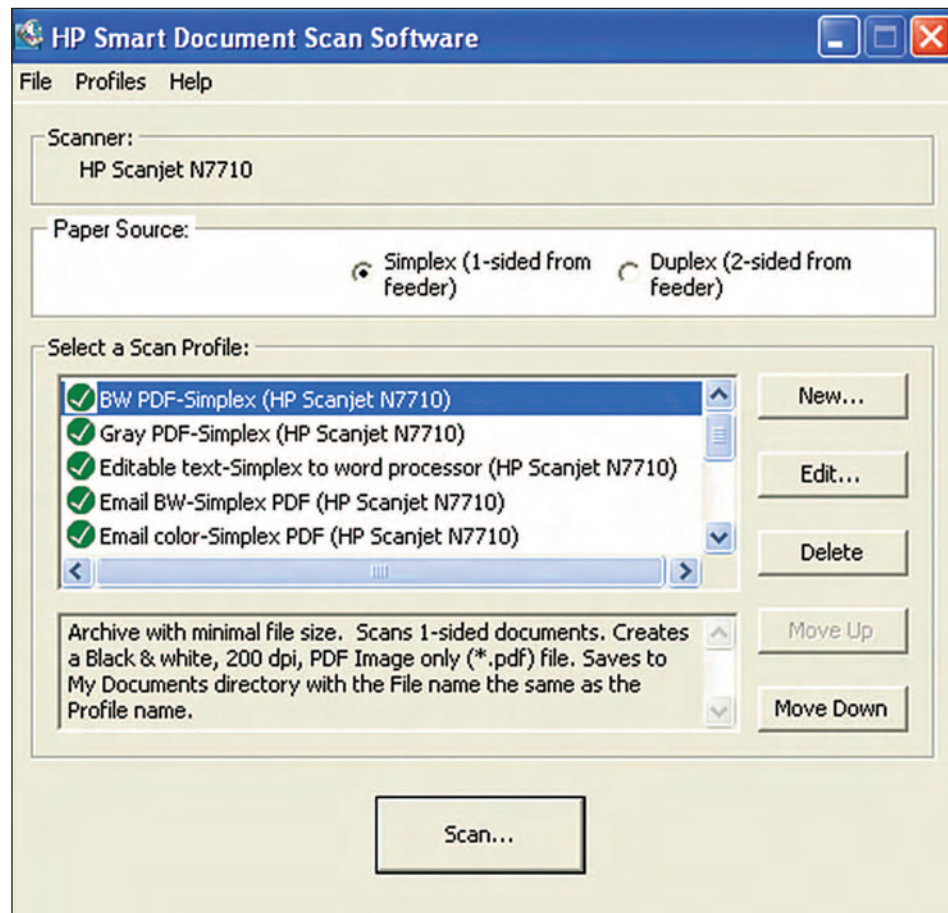

Quickly turn piles of paper into organized digital files.

Just drop a stack of sheets into the automatic document feeder, press a button to begin scanning and attend to other work. Use barcodes or blank page detection to divide batches into separate documents.

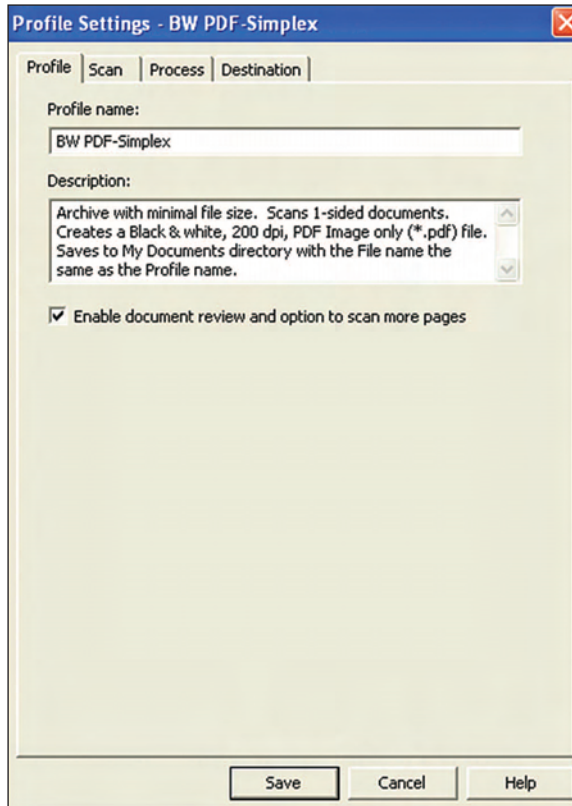

Get exactly what you want each time you scan.

Smart Document Scan Software lets you select settings for auto-crop, auto-straighten, auto-orientation, page resize and deletion of blank pages. Then, after pages are scanned, they can be reordered, deleted, or inserted and rotated using the preview window. The array of options and tools help you get just the result you're looking for.

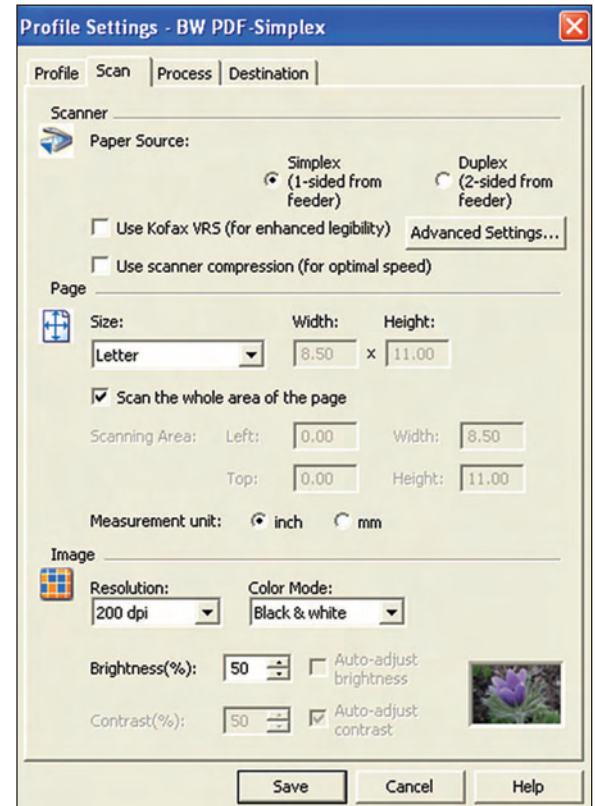

**Smart Document Scan Software makes complex scanning jobs simple. Just select a profile, press the scan button and walk away. Smart Document Scan Software does the rest. Need more flexibility? Create a profile that does exactly what you need for quality results, every time.**

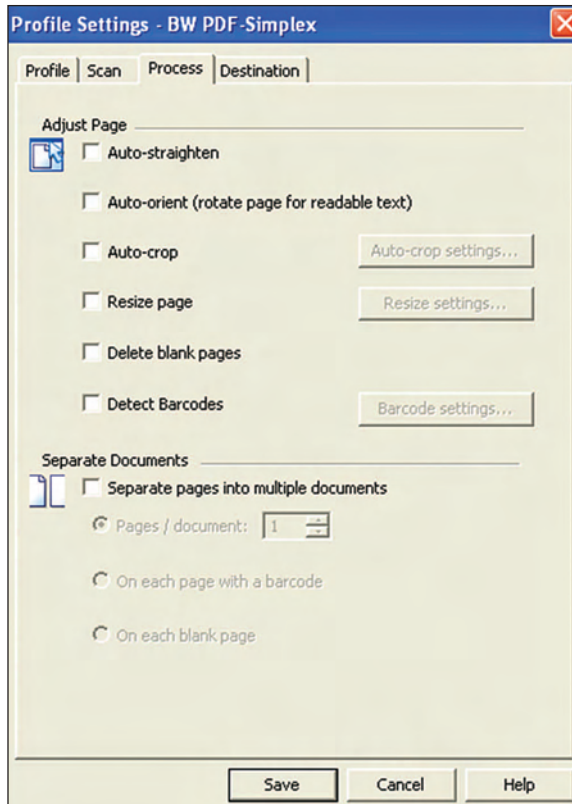

**Main Screen:** Create a custom profile to get the exact scan you want with one-click simplicity. Arrange your profile list so the most frequently used tasks are first.

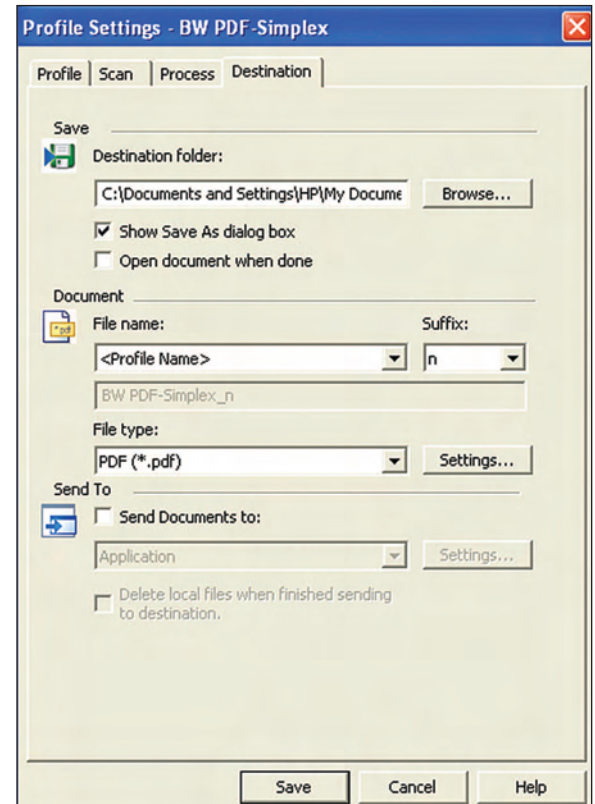

**Profile Tab:** Give your profile any name you choose. Add a description or comment to record important details.

**Scan Tab:** Select the resolution, color settings and document size you need.

**Process Tab:** Take advantage of automatic tools to remove blank pages, correct page orientation or page alignment, and more, to help you get better results.

**Destination Tab:** Save your scan as a common file format. Even choose to send it to another application for archival, sorting or to begin a business workflow.
