

Cover all your bases with endpoint protection

A system's only as strong as its most vulnerable laptop. Fast and secure endpoint backup, flexible and granular restore, scalable and unlimited storage.

Innovating for tomorrow's challenges

Reduced risk

Always be prepared with periodic document encryption and remote wipe, back-data isolation with copy separation from source data, and anomaly detection capabilities to identify abnormal file access patterns.

Rapid Recovery

Time is of the essence with point-in-time and granular restores, and metadata search for quick identification and recovery. Speed is only as useful as it is accurate.

Self-service

Delegate while retaining control with anytime access of all your laptop data from a browser-enabled device. Enable employees to search and restore files, and reduce your IT burden.

Got a need? Consider it covered

- ✔ Automated daily backups
- ✔ Silent backup of laptop and desktop data without impacting user productivity
- ✔ Secure laptop data with encryption, secure erase, geo-location, and remote wipe functions
- ✔ Secure data with two-factor authentication, SSO with SAML, and role-based access controls
- ✔ Secure data with two-factor authentication, SSO with SAML, and role-based access controls
- ✔ Source-side deduplication with “incremental forever” minimizes network usage
- ✔ Reporting and alerting functionality on health of backups
- ✔ Dashboard and integrated console for easy management

Supported Platforms and Applications

Operating Systems

Linux

- Fedora release 29 to current
- Debian 9.x to current
- SLES 11.x to 15.x
- RHEL/CentOS 7.x and 8.x
- Ubuntu 8.04 to 18.10
- MacOS Sierra to MacOS Mojave

Windows

- Windows clients - Windows
- 7 to Windows 10

Storage

- Microsoft Azure Blob- Hot, Cool, Archive storage
- Unlimited cloud storage included

Ready to try before you buy?

45-day free trial, that includes support and seamlessly converts into a subscription.
