

# Creative Cloud K-12 Site License and student- owned devices

Adobe Creative Cloud site license for primary and secondary schools offers the flexibility of Bring Your Own Device (BYOD) deployment. Schools with BYOD environments can give their students access to the full power of Creative Cloud.

## Benefits

- Affordable and easy to manage Creative Cloud solution.
- Supports BYOD environments in primary and secondary schools through the use of device licenses by K-12 students of any age.\*
- Available for both Windows and Macintosh computers in multiple languages.
- Licenses can be assigned to students for regular classes and homework, virtual school programs, short-term courses, after-school activities or summer classes.
- A license can be revoked once a student has finished a class or left the school, and it can be easily re-assigned to another student.
- Includes the full set of all Creative Cloud desktop applications (services not included).

\* Device licenses do not have access to Creative Cloud services or storage; therefore, device licenses may be used for BYOD by students under age 13 as long as the school approves this use and takes responsibility for all student use of licenses. Use of device licenses for BYOD is limited to K-12 schools and is not permitted for institutions of post-secondary/higher education.
