ESET Secure Enterprise Agreement

ESET's bundled solution is the perfect choice for businesses of 250 seats or more. With Flexible licenses that cover your current IT environment, then flex as you grow, ESET makes scalable security a snap.

Simplify purchasing

- Increase your seat count as you need and "true-up" annually
- Spread payments over three years; offering effective budget management while freeing up working capital

Cost benefits

- Take advantage of multi-year discount pricing with low annual payments

Cover all platforms

- Protect workstations, servers, mailboxes, SharePoint and mobile devices with one bundle

ENDPOINT ANTIVIRUS

MOBILE SECURITY

FILE SECURITY

VIRTUALIZATION

ENDPOINT SECURITY

MAIL SECURITY

SHAREPOINT SECURITY

Security that's a perfect fit

Keep your network clean and protect against emerging threats on computers, laptops, mobile devices and servers. ESET Enterprise bundle fits seamlessly with your Microsoft components and is easily manageable from a single console. ESET protects your business with firewall, antispam and URL content filtering, and prevents email-borne malware and phishing scams. Detects and prevents malware being uploaded to and downloaded from your SharePoint servers so they are not mediums for spreading malware, inappropriate content and data leakage.

With ESET, you get **MORE** protection from an established leader in cybersecurity.

Making security claims is one thing. Consistently developing proactive, multilayered endpoint security technologies for a quarter-century—as ESET has done—is another.

Our endpoint security technology is proprietary, and it has consistently set the industry standard. For example, we launched the movement to drop solely signature-based security and focus on behavioral analysis. And we introduced cloud-based malware detection more than 10 years ago.

ESET is the fastest growing of the global top five endpoint security vendors, driven by businesses all around the world that are switching from outdated antivirus software to powerful endpoint security protection.

MORE security incidents are prevented when you have ESET's multilayered protection.

The more multilayered your security, the fewer incidents you'll need to resolve. ESET's cloud-augmented, proactive and intelligent technology prevents more malware-based incidents thanks to its advanced threat detection.

MERCURY

" The biggest thing that stands out is its strong technical advantage over other products in the marketplace. ESET offers us reliable security, meaning that I can work on any project at any time knowing our computers are protected 100%."

—FIONA GARLAND, Business Analyst, Group IT, Mercury Engineering, Ireland

HOW ESET ENDPOINT SECURITY TECHNOLOGY HAS EVOLVED

1995	Heuristic detection
2002	Advanced heuristics Behavioral detection
2005	Cloud malware detection in the form of ESET LiveGrid®
2005	DNA signatures
2012	Network attack protection
2013	Exploit blocker—Advanced memory scanner CMPS/DNA hash—Device control
2014	Botnet protection
2015	Network signatures—ESET shared local cache

About ESET: ESET is a Slovakia-based IT security company founded in 1992 and headquartered in Bratislava. The company has a global presence, with regional distribution centers in San Diego, Buenos Aires and Singapore, and offices in Sao Paulo and Prague.
