

# Novell GroupWise

**Novell® GroupWise® has always been a secure, reliable “home base” for workforce productivity. Now, Novell GroupWise 2014 enhances the email you love with all-new features and a sleek, dynamic user interface. With enhancements in all the places users work—as well as behind the scenes, where administrators live—GroupWise 2014 will help you get more done at every level of your organization.**

## Novell GroupWise at a glance:

**GroupWise is a complete email, calendaring, task management and contact management system that helps you be:**

- **Mobile:** Lets users and admins work from wherever they roam
- **Flexible:** Works with your current environment and interoperates with Microsoft Active Directory and Exchange
- **Productive:** Offers new features and a fresh look and feel to keep users working at peak productivity

## Getting Things Done Like Never Before

Novell GroupWise 2014 comes with enhanced mobile device support, new desktop features, powerful new tools for administrators, and technological changes that will help your business run more efficiently. After all, email isn't about being flashy—it's about getting things done.

## Unleash a Mobile Workforce

Mobility doesn't just mean keeping your users moving, it means keeping them productive. GroupWise 2014 does both. GroupWise 2014 offers synchronization with today's popular mobile devices, an updated WebAccess interface and custom templates for the tablets that are fast becoming a business imperative for the modern workforce.

Users can now synchronize emails, schedules, contacts, notes and tasks between GroupWise and a more comprehensive list of mobile devices. And GroupWise 2014 offers more scalable device support, so growing numbers of mobile users won't slow you down.

Even users without a mobile device can work on the go. Novell GroupWise WebAccess gives remote users access to their email and

schedules from any location with an Internet connection. WebAccess in GroupWise 2014 features an updated look and feel and auto-refresh capabilities to help users work faster.

GroupWise 2014 also offers mobility and productivity for the IT department. GroupWise administration has always been significantly easier than competitors' solutions, allowing a single admin to manage email for thousands of users. Now it comes with a new, web-based administration console that streamlines management tasks more than ever. This console is much sleeker and easier to use, with new features like advanced querying and reporting, a global search function, and the ability to delegate granular admin rights. IT admins can also access this console anywhere they have a browser, meaning they can stop, start and restart agents remotely, without accessing the server first. And they can use the new, live system-overview page to gauge system status and performance on the go.

## Choice and Flexibility

The days of monolithic IT infrastructure are over. To provide email services in modern mixed environments, you have to be flexible. Novell GroupWise 2014 is lithe enough to mold itself to your organization.

**In this modern era of data protection controls and regulatory oversight, Novell GroupWise offers something many email packages can't: a secure, reliable and cost-effective solution that keeps your data on-premises and firmly within IT's control.**

[www.novell.com](http://www.novell.com)

Since the boss is sure to demand a system that will work with collaborators inside and outside your organization, GroupWise interoperates with Microsoft Exchange, providing the ability to synchronize address books and busy search across both systems. And it offers a clean, streamlined interface that adapts to user work patterns and offers unparalleled flexibility to change decisions on the fly—from adding a signature, selecting an item type or replying versus replying to all.

For those running the back end, the flexibility of GroupWise will streamline your workload like never before. It installs and upgrades simply, while working seamlessly with Active Directory and NetIQ eDirectory. It works on a variety of back-end platforms, desktop clients and mobile devices. When it comes to your environment, we feel it's important to leverage what you've got—and support what you need.

### **The Latest Tech for All**

Because new technology should feel as modern as it is, we've put significant effort into updating the GroupWise client look and feel. The effect is subtle, but important. We've updated fonts, removed harsh borders and gradients, optimized spacing and contrast, flattened icons and eliminated visual clutter.

But our usability enhancements go beyond appearances. GroupWise 2014 has a fluid interface that automatically delivers the features and commands you use most—and that removes or hides extraneous functions. For example:

- *A new "Quick To" list, which uses a relevancy algorithm to give you access to the people you contact often*
- *A new Compose view with the ability to toggle CC, BC and other occasionally used fields on or off*
- *An Options slide-out that dynamically serves up just the right tools for the task at hand*

Users aren't the only ones who benefit from new technology in GroupWise 2014. IT's load is also made lighter with support for the latest hardware, desktop operating systems, browsers and mobile devices.

The bottom line? GroupWise 2014 is a comprehensive personal productivity solution that meets the needs of everyone from end users and business decision makers to the IT staff that enable their success. It's a solution that offers the cost effectiveness and administrative ease of the cloud *without* transferring control of your data. It's a solution that gives you worry-free security and the ability to control your own compliance destiny. It's Novell GroupWise 2014, and it gets things done.
