ESET®

MAIL SECURITY
FOR LINUX/FREE BSD

ENJOY SAFER TECHNOLOGY™
WHAT IT DOES

Antivirus and Antispyware

Scans all inbound and outbound POP3, SMTP and IMAP traffic

ESETS_SMTP module runs independent of the Mail Transport Agent (MTA)

Filters out email-borne threats, including spyware at the gateway level

Powered by the advanced ThreatSense® technology combining speed, accuracy and minimal system impact

Antispam

Stops spam and phishing messages with high interception rates

Features improved antispam engine with an option to define threshold levels with great precision

Cross-platform Protection

Eliminates malware targeting all platforms, including Windows, Mac and Linux operating systems

Prevents spreading of malware from one platform to another

Remote Administration

Compatible with ESET Remote Administrator and supports management through a web interface

Gives you the option to schedule on-demand scans, actions and security tasks

Allows you to customize log details and modify reports and notifications to help you monitor compliance with company security standards

Smooth Operation

Features content filters for Postfix, Sendmail, Qmail, Exim, Zmailer, and others

Smoothly integrates in the Novell Groupwise environment

Ready for integration with Zarafa collaborative software

Built-in license manager automatically merges two or more licenses with the same customer name

Distribution Independent Solution

ESET provides installers for the most popular distributions

Gives you the option to use the general installation package for less common systems not supported directly

ESET
MAIL
SECURITY
FOR LINUX/FREE BSD

Operating Systems:
Linux: Kernel version 2.6.x; glibc 2.3.2 or higher
FreeBSD: Version 6.x, 7.x, 8.x
