

# Data Leak Prevention

**eset** TECHNOLOGY ALLIANCE

# Safetica

Safetica security software offers a full DLP (Data Leak Prevention) solution that covers a wide range of security threats that originate from a common source – the human factor. Safetica defends against planned or accidental data leaks, malicious insider actions, productivity issues, BYOD dangers and more.

Safetica's security philosophy is based on three pillars: completeness, flexibility and ease of use.

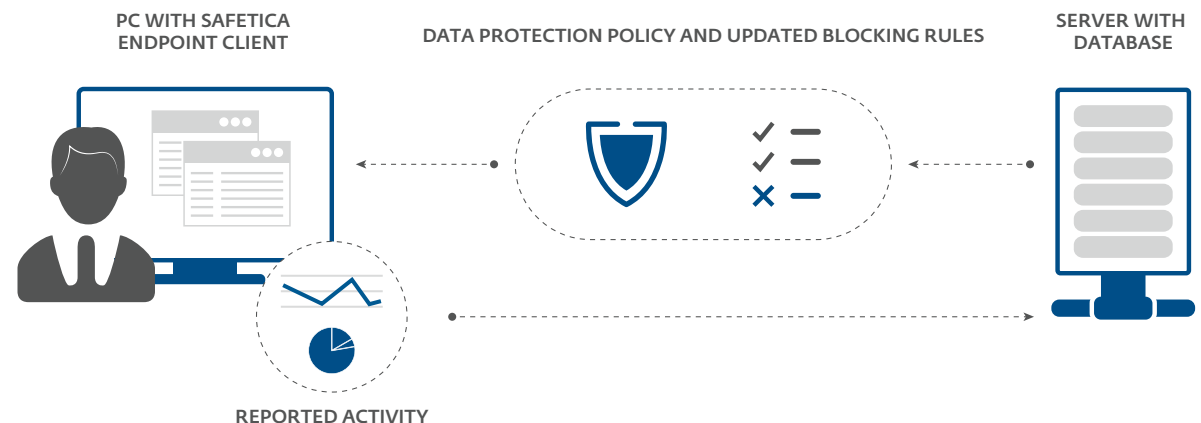

Safetica provides a full-fledged corporate-level Data Leak Prevention solution, giving management complete activity reports and enforcing company security policies on user activities. Safetica offers a full set of security tools in a single software package that would otherwise require several security solutions from different vendors.

## Key advantages

<b>Full suite DLP solution</b>	Covers all major data leak channels. Safetica provides endpoint DLP with network DLP capabilities.
<b>Short time-to-benefit</b>	Flexible approach to blocking data leak channels gives Safetica the fastest deployment time in its product class.
<b>High level of tamper resistance</b>	Ensures consistent protection, even while covering users with administrative rights.
<b>All specialty functions covered against leakage</b>	Safetica protects data from print screening, clipboard stealing, virtual printing, file transformations, archiving and encrypting functions.
<b>Agnostic approach</b>	Safetica data protection is not limited by individual protocols or applications.
<b>Clearly defined data policies</b>	With Safe Areas. Managers just select locations from where confidential data cannot leave. Safetica takes care of the security.
<b>Exact time tracking</b>	Opened does not mean actively used. Safetica activity reports show the actual time users were active at visited websites or in applications.
<b>Automatic evaluation and alerts</b>	Safetica picks the most important logged details and sends a summary report to designated recipients. Complete details are available as needed.

## How it works

The endpoint workstation is where the action happens. Users work with business critical data, access the internet, read emails, send documents to the printer and plug in their portable media. Safetica deploys an agent (**Safetica Endpoint Client**) to desired endpoints and maintains regular connection with them through the server (**Safetica Management Service**). This server builds a database of workstation activity and distributes new data protection policies and regulations to each workstation.

## Key features

<b>Complete Data Leak Prevention</b>	Safetica covers all data leak channels while being easy to install and operate. See Endpoint Events Coverage for proof of Safetica's comprehensive coverage.
<b>Trends and Productivity Profiling</b>	Warns company management in the event of sudden changes in employee activity and shows productivity changes by department over time. Both changes are indications of possible security risks.
<b>Activity Reporting</b>	Uncovers security breaches on many fronts by checking all user activities for signs of potential danger, even before the actual transfer of data.
<b>E-mail DLP</b>	Ensures protected data stays out of the wrong mailbox. Records where sensitive files have been sent and stores this information for future reports.
<b>Application Control with Time Rules</b>	Enables selected package of work-related applications and blocks others for a more secure environment. Applications can be made available only for a specified time frame.
<b>Web Filtering</b>	Easily enforces company AUP (Acceptable Use Policy) with carefully preselected categories and keyword filtering.
<b>Print Control</b>	Limits what can be printed and by whom with quotas for individual users and departments.
<b>Device Control</b>	Prevents employees from connecting unauthorized devices at work. Common ports can be enabled for particular devices or blocked for all of them.
<b>Encryption Management</b>	Safetica offers Full Disc Encryption or encrypts whole partitions and creates local or network virtual drives for secure file storage. In addition to password and key access methods, Safetica offers secured Travel Disks and an "encrypt when copying out" feature for data leaving the Safe Area.
<b>Informative and Testing Mode</b>	Helps companies progressively integrate data protection by enabling tests for all "what-if" situations without halting business processes.
<b>On-the-Fly Data Classification</b>	Protects new information immediately after a classified file is created or received.
<b>Unified Management Console</b>	Safetica Management Console enables one-stop security management and reporting, and integrates all company data protection, reporting and blocking policies.
<b>SSL/HTTPS Inspection</b>	Checks and protects secured communication lines including websites using HTTPS protocol, IM applications with secured connections and secured email transmission.
<b>Minimal Total Cost of Ownership (TCO)</b>	Frees users from the need to buy extra security appliances. The endpoint agents deployed in Safetica also provide Data Leak Prevention features for company networks.
<b>Flexible Use</b>	Safetica covers any application, Instant Messaging protocol or webmail service thanks to its unique universal approach.

# ESET Technology Alliance

ESET Technology Alliance aims to better protect businesses with a range of complementary IT security solutions. We provide customers with a better option when staying protected in the ever-changing security environment by combining our proven and trusted technology with other best-of-breed products.

## Endpoint events coverage

### Reporting and Activity Blocking

- All file operations
- Long-term trends, short-term activity fluctuations
- Websites (all browsers supported including HTTPS traffic)—active and inactive time
- E-mails and webmails (virtually all providers)
- Searched keywords (majority of engines supported, Windows Search supported)
- Instant messaging (application independent —all protocols)
- Application usage with both active and inactive time
- Virtual, local and network printers
- Screen activity (intelligent capturing)
- Keylogging

### Data Leak Prevention

- All hard drives, USB, FireWire, SD/MMC/CF cards, SCSI drives
- Network file transfer (unsecured, secured)
- E-mails (SMTP, POP, IMAP, Microsoft Outlook/MAPI protocols)
- SSL/HTTPS (all browsers and applications with standard certificate management)
- Copy/paste, clipboard, drag and drop
- Virtual, local and network printers
- Bluetooth, IR/COM/parallel ports
- CD/DVD/Blu-Ray readers and recorders
- Controls application file access

# System requirements

## Safetica Endpoint Client

(agent software)

- 2.4 GHz dual-core processor 32-bit (x86) or 64-bit (x64)
- 2 GB of RAM memory
- 2 GB of free disk space
- Installation on client
- MS Windows XP SP3, Vista, 7, 32-bit and 64-bit
- MSI installation package

## Safetica Management Service

(server component)

- 2 GHz dual-core processor 32-bit (x86) or 64-bit (x64)
- 2 GB of RAM memory
- 10 GB of free disk space
- Installation on application server or a dedicated server (virtualization is possible)
- More servers for better load balancing availability
- Support for Active Directory, but not mandatory
- MS Windows Server 2003 SP2, 2008, 2008 R2, 32-bit and 64-bit
- Requires connection to server with MS SQL 2008 or higher

## MS SQL

(server component for standard installation)

- 1 GHz processor 32-bit (x86) or 64-bit (x64)
- 4 GB or more of RAM memory (critical performance component)
- 200 GB of free disk space (optimal 500 GB or more, depending on monitoring settings and number of clients)
- Shared or dedicated server, MS Windows Server 2003 SP2, 2008, 2008 R2, 32-bit and 64-bit

# Use cases

## Securing key business information

Once safe areas for all protected data have been established, Safetica silently checks every interaction with these files and, in case of a forbidden operation, blocks it or performs other selected actions. These company-defined actions can include informing the security manager of each event, encrypting data, and offering other safe locations for data. Data is protected on laptops and flash drives even outside of the company walls.

## Management of removable devices

Safetica gives management final control over who plugs what into company computers, removing another channel for data leaks and dramatically decreasing the number of required service interventions.

## Reach regulatory compliance

With Safetica Endpoint Client present on company computers and policy management activated in the Safetica Management Console, you are able to comply with regulations governing the movement and usage of sensitive data.

## Data Encryption

Safetica offers Full Disc Encryption, which can oversee a secure encrypted file storage system, manage connected keys and prevent data from being stored in unsecure locations.

## Productivity control

Even without directly using the Safetica Management Console GUI, managers can receive regular summary reports on selected endpoint users or groups.
