

# **ESET**SECURE AUTHENTICATION

ESET Secure Authentication helps businesses to make access to their data secure. Any organization can set up ESET's two-factor authentication in just 10 minutes—and thus easily reduce the risk of data breaches caused by stolen, weak or compromised passwords.

The solution consists of the server side and the client side—the latter comes in the form of a mobile app. The authentication options include Push Authentication, as well as generating and delivering one-time passwords (OTPs) via the mobile app, and also via SMS messages or your organization's existing hardware tokens.

### Two-factor authentication for extra data protection

You can use ESET Secure Authentication for:

- · Accessing your company's VPN
- Remote Desktop Protocol
- Additional authentication for desktop login (signing in to an operating system)
- Web/cloud services via Microsoft ADFS 3.0, such as Office 365 and Google Apps
- Various Microsoft Web Apps, such as Outlook Web Access (OWA)
- Exchange Control Panel 2010 and Exchange Administrator Center 2013
- VMware Horizon View
- RADIUS-based services

ESET Secure Authentication also comes with an API to integrate it with your existing Active Directory-based authentication, as well as with an SDK that easily implements into any proprietary system.

#### **Business benefits**

- Helps prevent the risk of breaches, with unique passwords for each access
- Protects against poor password practices
- Gives you the flexibility to define your own OTP delivery channel (e.g., your own SMS gateway)
- Saves costs—no additional hardware needed
- Easy to migrate to and use
- Supports existing hardware tokens to meet compliance requirements
- Also adds 2FA to your cloud applications, such as Office 365 or Google Apps

#### IT benefits

- API/SDK for easy integration into proprietary software and business tools
- App works without internet connection (once downloaded)
- Works with a broad range of VPN appliances
- Supports most types of mobile operating systems
- Global technical support in local languages
- Out-of-the-box solution
- Increases productivity and reduces unnecessary friction when accessing trusted sites, thanks to IP Whitelisting
- Tools for deployment and configuration in large user environment

# Datasheet

Two-factor Authentication	Mobile-based, two-factor authentication (2FA) for a higher level of security
	Native support for a broad range of platforms (see Supported platforms overview, below)
	Software-based solution—no need to carry additional device or token
	Convenient for the mobile workforce
	Support for hardware tokens
Client Side (mobile app)	One-tap installation, simple and effective user interface
	Compatible with any mobile phone supporting SMS messaging
	Supports a broad range of mobile operating systems
	PIN-protected access to prevent fraud in case of device theft or loss
	Apps available in these languages: English, German, Russian, French, Spanish, Slovak
Authentication Methods	Mobile client app—generates OTPs; no internet connection required
	Push Authentication—single-touch authentication via mobile phone (requires mobile client app; works with Android devices)
	SMS delivery of OTPs
	Hardware tokens (while the solution does not require hardware tokens to work, it supports all event-based HOTP tokens that are OATH-compliant)
	Custom methods (e.g., via email)
Server Side	Out-of-the-box solution
	Easy double-click installation and setup
	The installer automatically recognizes OS and selects all suitable components
	Interactive installer, drop-in installation into ADFS
Custom Integration Options	In Active Directory environment, use either ESET Secure Authentication API or User Management API for easy integration into proprietary systems
	SDK allows for implementation for non-Active Directory users
Remote Management	Supports Microsoft Management Console (MMC)
	Active Directory integration
	ESET Secure Authentication extends Active Directory Users and Computers (ADUC plugin) with additional features to enable managing the users' 2FA settings

## Supported platforms overview

For detailed technical requirements, please consult the ESET Secure Authentication product manual, available at this address: <a href="http://download.eset.com/manuals/eset\_esa\_product\_manual\_enu.pdf">http://download.eset.com/manuals/eset\_esa\_product\_manual\_enu.pdf</a>

Remote Login Platforms	Remote Desktop Protocol		
	VPN Protection:  Barracuda, Cisco ASA, Citrix Access Gateway, Citrix NetScaler, Check Point Software, Cyberoam, F5 FirePass, Fortinet FortiGate, Juniper, Palo Alto, SonicWall		
Local Login Protection (Windows)	Windows 7 and later	Windows Server 2008 R2 and later	
Active Directory Federation Services	Microsoft ADFS 3.0 (Windows Server 2012 R2)		
Supported VDI Platforms	VMware Horizon View	Citrix XenApp	
Microsoft Web Applications	Outlook Web Access	Microsoft Dynamics CRM 2011, 2013, 2015	
	Microsoft Exchange 2010	Microsoft SharePoint 2010, 2013	
	Outlook Web App	Microsoft Remote Desktop Web Access	
	Exchange Control Panel	Microsoft Terminal Services Web Access	
	Microsoft Exchange 2013	Microsoft Remote Web Access	
	Exchange Admin Center		
Custom Integration	ESET Secure Authentication easily integrates with your RADIUS-based services as well as via the ESET Secure Authentication API or the User Management API to your existing Active Directory-based authentication. Non-Active Directory customers with custom systems can use the easy-to-deploy SDK		
Operating Systems (Server Side)	Windows Server 2003 (32- & 64-bit), 2003 R2 (32- & 64-bit), 2008 (32- & 64-bit), 2008 R2, 2012, 2012 R2		
	Windows Small Business Server 2008, 2011		
	Windows Server 2012 Essentials, 2012 R2 Essentials		
	Management tools are also supported on client operating systems from Windows XP SP3 onwards, in both 32-bit and 64-bit versions		
Supported Mobile Phone Platforms (Client Side App)	iOS	BlackBerry	
	Android	Symbian—all supporting J2ME	
	Windows Phone	All J2ME-enabled phones	
	Windows Mobile
