

Symantec™ Endpoint Protection Small Business Edition

Trusted protection from malware and email-borne threats

Overview

Symantec Endpoint Protection Small Business Edition is a simple, easy-to-use, and cost-effective solution designed to safeguard business assets with Symantec's advanced antivirus and email protection.

Endpoint protection

Symantec™ Endpoint Protection delivers more than world-class, industry-leading antivirus and antispymware signature-based protection. It also provides advanced threat prevention that protect endpoints from targeted attacks and attacks not seen before. It includes turn-key, proactive technologies that automatically analyze application behaviors and network communications to detect and block suspicious activities, as well as administrative control features that allow you to deny specific device and application activities deemed as high risk for your organization—you can even block specific actions based on the location of the user. This multilayered approach significantly lowers risks and gives you the confidence that your business assets are protected. It is a comprehensive product gives you all the capabilities now with the ability to enable the pieces you need, as you need them. Whether the attack is coming from a malicious insider or is externally motivated, endpoints will be protected.

Mail protection

Symantec™ Mail Security provides high-performance mail protection against virus threats, and security risks for Microsoft® Exchange servers. With the purchase of a license key, Symantec Premium AntiSpam™ can be integrated to provide accurate spam detection without additional administration, installation, or hardware.

Symantec also offers a range of consulting, technical education, and support services to guide you through the migration, deployment, and management of Symantec Endpoint Protection Small Business Edition and help you realize the full value of your investment. Essential Support Services provide confidence that your critical assets are protected around the clock. For organizations that want to outsource security monitoring and management, Symantec also offers Managed Security Services to deliver real-time security protection.

Key benefits

Secure

Multilayered defense—Includes the integrated Symantec Endpoint Protection solution for Microsoft Windows® operating systems, in addition to the award-winning Symantec™ Mail Security for Microsoft Exchange®. This combination provides heightened protection against the evolving threat landscape and protects against email-borne virus threats, and security risks in a turnkey package.

Comprehensive protection—Integrates best-of-breed technologies to stop security threats—even from the most devious new and unknown attackers—before they penetrate the network. Detects and blocks malicious software in real time, including viruses, worms, Trojan horses, spyware, adware, and rootkits.

Data Sheet: Endpoint Security

Symantec Endpoint Protection Small Business Edition

Proactive protection—New Proactive Threat Scan uses a unique Symantec technology to score both good and bad behaviors of unknown applications, enhancing detection and reducing false positives without the need to create rules-based configurations.

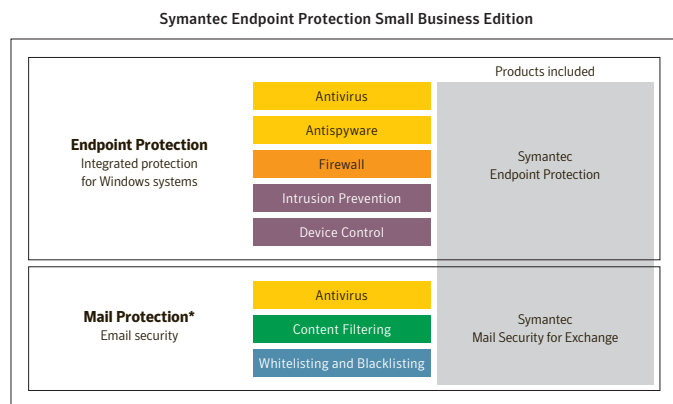

Industry-best threat landscape intelligence—Symantec’s protection mechanisms utilize the industry-leading Symantec™ Global Intelligence Network to deliver an unparalleled view of the entire Internet threat landscape. This intelligence results in actionable protection and peace of mind against evolving attacks.

Simple

Easy to install, configure and manage—Symantec Endpoint Protection makes it easy to enable, disable, and configure desired technologies to fit into your environment.

Seamless

Symantec Network Access Control ready—Each endpoint becomes “Symantec Network Access Control ready,” eliminating the need to deploy additional network access control endpoint agent software.

* Symantec Premium AntiSpam™ available as an optional add-on module

Multi-Tier Protection from malware and email-borne threats

Key Features

More than antivirus

Antivirus and antispyware—Symantec Endpoint Protection provides best-of-breed malware protection, including market-leading antivirus protection, enhanced spyware protection, new rootkit protection, reduced memory footprint, and new dynamic performance adjustments to keep users productive.

Network threat protection—Offers a rules-based firewall engine and Generic Exploit Blocking (GEB) that blocks malware before it can enter a system.

Proactive threat protection—Provides protection for unseen threats (i.e., zero-day threats). Includes Proactive Threat Scan which does not rely on a signatures.

Single agent and single management console—The Symantec Endpoint Protection portion of Symantec AntiVirus Enterprise Edition provides antivirus, antispyware, desktop firewall, IPS, device control, and network access control (with the purchase of a Symantec Network Access Control license) on a single agent—all managed by a single management console.

Email Protection—Provides protection against email-borne virus threats and security risks in a turnkey package.
