Symantec™ Mobile Security Corporate Edition for Symbian™
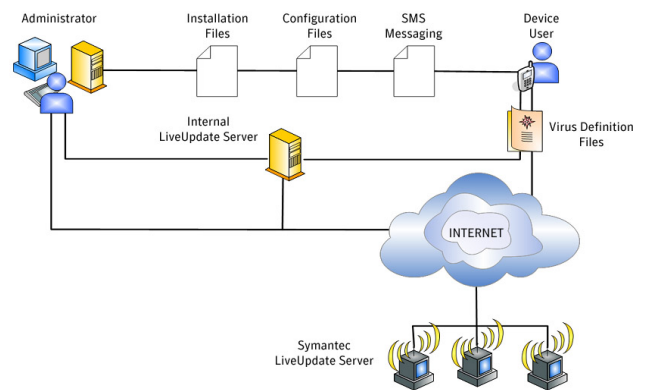

Threat protection through integrated antivirus and firewall technologies for Symbian OS Series 60 and Series 80 supported smartphones

Overview

Symantec Mobile Security Corporate Edition for Symbian provides integrated antivirus and firewall capabilities for Symbian OS Series 60 and Series 80 supported smartphones to provide proactive protection against all Symbian file-based forms of malicious threats, such as viruses, Trojans, and worms. Real-time automatic and on-demand virus scan capabilities protect files that are stored on the smartphones file system, while the firewall uses protocol and port filtering to protect the data and applications being transmitted. Centralized management via a third-party mobile device management enables administrators to configure, lock, and enforce security policies either remotely or locally, while automatic wireless security and application updates keep on-device protection current.

Key benefits

• Protects Symbian OS Series 60 and Series 80 smartphones from unwanted network intrusions, as well as from viruses, Trojans, and worms

• Allows IT to extend existing security policies to Symbian OS series 60 and Series 80 smartphones to mitigate threats and protect existing infrastructure

• Centralized management via a third-party mobile device management enables administrators to configure, lock, and enforce security policies either remotely or locally

Management and updating of Symantec Mobile Security for Symbian

• Automatic wireless security and application updates via LiveUpdate™ keep on-device protection current
