Veeam Backup *for Microsoft Office 365*

Total access, control and protection of Office 365 data

Microsoft provides a wide array of powerful services within Office 365 — but a comprehensive backup of your Office 365 data is not one of them.

Veeam® Backup *for Microsoft Office 365* eliminates the risk of losing access and control over your Office 365 data including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams — so that your data is always protected and accessible.

With Office 365, it's your data

Microsoft Office 365 enables your enterprise to work anywhere, anytime, without the need to host your own email, files and content management infrastructure. Even though Microsoft hosts the infrastructure, this doesn't replace your responsibility of maintaining a backup of your business-critical Office 365 data.

With Office 365, it's your data — you control it — and it is your responsibility to protect it.

With Veeam Backup *for Microsoft Office 365*, you can:

- **Protect your Office 365 data** from accidental deletion, security threats and retention policy gaps
- **Quickly restore individual Office 365 items and files** with industry-leading recovery flexibility
- **Meet legal and compliance requirements** with efficient eDiscovery of Office 365 backup items

What's new in version 3

NEW! Up to 30x faster backups
Increase SharePoint Online and OneDrive for Business incremental backups, dramatically shortening Office 365 backup windows from hours to minutes and minutes to seconds.
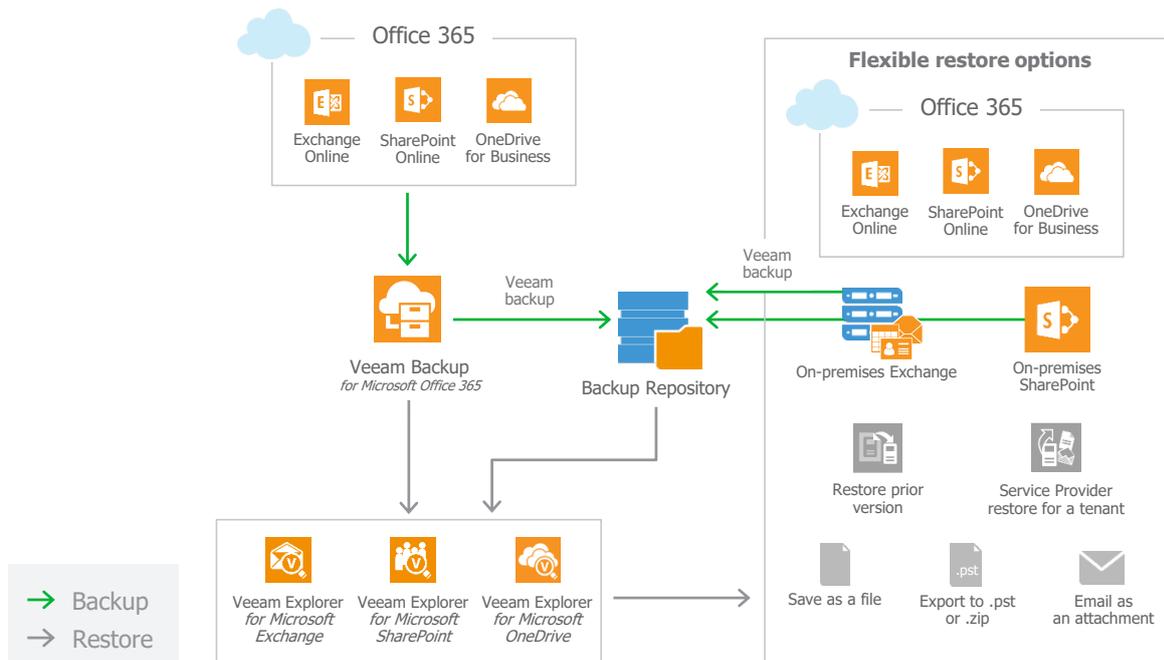

NEW! Increased security
Perform secure backups and restores with multi-factor authentication.

ENHANCED! Office 365 data protection reports
Identify unprotected Office 365 mailboxes and manage license and storage usage.

"With Veeam Backup for Microsoft Office 365, our customers will sleep soundly knowing that their emails are fully safe."

Jérémy Verda,
Executive System Engineer
Logical TIC SPRL

Backup Office 365 to any location — on premises or in the cloud

- Retrieve Office 365 Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams data from a cloud-based instance of Office 365 and uniquely backup the data weekly, daily, or as often as every five minutes in Microsoft's native format — an archive database based on Extensible Storage Engine (ESE), also known as the Jet Blue database

- Backup Exchange and SharePoint on-premises, reducing the impact to your datacenter and allowing YOU to set the frequency and timing of your backups

- Store backups in the location of your choice — including on-premises, in a hyperscale public cloud (i.e. Microsoft Azure or Amazon Web Services) or with a local service provider

- Protect data posted and shared with Microsoft Teams chats, files and sites, as Teams data is journaled into Exchange Online and SharePoint Online

Restore Office 365 with industry-leading recovery flexibility

Never settle for less than reliable, granular restore of Office 365 email items, SharePoint sites, documents, libraries and lists as well as OneDrive for Business accounts, files and folders in a few simple clicks.

- Quick search and granular recovery of individual objects — including Microsoft Teams data — residing in a protected copy of your Office 365 backup

- Direct restore of Office 365 items through an industry-leading number of ways giving you ultimate restore flexibility

eDiscovery of Office 365 data

Without an easily accessible copy of your data, retrieving emails for regulatory or compliance reasons can be costly, time consuming and a major disruption to your business.

With Veeam, you can leverage the familiar, advanced search capabilities and the flexible recovery and export options to perform eDiscovery on Office 365 data — just as easily as you would with a traditional on-premises data backup.

"With Veeam Backup *for Microsoft Office 365,* we can **take back control** of our mailboxes. We can have our own off-site repository for safe keeping and we can recover lost emails with ease."

Gary Meers
Chief Technology Officer
saberVox

Meet security and compliance requirements

Security and compliance concerns are big drivers for the need to backup Office 365:

- Store data based on long-term retention policies for regulatory or compliance needs

- Ensure you recover exactly what you need — no more, no less — with granular advanced search and find functionality

- Increase security for Office 365 backup data with multi-factor authentication

Efficiently scale and minimize overhead

Unmatched scalability with a multi-repository, multi-tenant architecture, comprehensive automation with full PowerShell and RESTful API support, as well as self-service restore for service provider's customers.

Unified on-premises and Office 365 backup

Veeam Backup *for Microsoft Office 365* also allows you to protect hybrid email and SharePoint deployments as well as migrate mailbox data between on-premises Exchange and Office 365.
