VMware vSphere Optimization Assessment

Experience the Power of Operations Management

Deliver Agility with Control and Efficiency

Virtualizing your servers with vSphere was a smart move, helping you dramatically reduce IT costs and increase the agility of your business. But as your virtual environment grows, maintaining full visibility of your infrastructure becomes more challenging. When it comes to your virtualized environment, are you:

Managing IT capacity using spreadsheets?

Experiencing poor visibility into virtual machine (VM) utilization?

Restricting IT updates due to resource constraints?

With VMware Operations Management solutions, you could get[1]:

2.4x Return on Investment

54% Decrease in Downtime

**30%** More Visibility

53% Reduction in IT Costs

Let us show you how with a free vSphere Optimization Assessment
The vSphere Optimization Assessment provides a free comprehensive analysis of the optimization opportunities in your virtualized environment. This easy and powerful 30-day program leverages the operations analytics and automation capabilities of VMware vRealize Operations.

See value from day one and get your customized Optimization Assessment Reports
This assessment delivers immediate value starting day one with a vSphere configuration audit report, and provides additional benefits by identifying performance improvement and capacity optimization recommendations. At the end of the trial, we will present you with your consolidated vSphere Optimization Assessment Report, to clearly illustrate how you can improve your virtual environment's *Health,* manage *Risk* and increase *Efficiency.*

Find out how you benefit from VMware vSphere with Operations Management
This visibility will allow you to proactively ensure service levels, optimize resource usage, and proactively manage your dynamic virtual and cloud environments.

Instead of reacting to problems, you are able to solve them before they happen. An assessment like this can be billed at over $1000, and we are offering it to you at no cost because we want to show you the power of VMware Operations Management.

IMPROVE SLAs FOR BUSINESS CRITICAL APPS:

Availability increases by **98%**

Application downtime cut by **36%**

OVERCOME RESOURCE LIMITATIONS AND IMPROVE PLANNING:

Reclaim over-provisioned VMs

Reduce IT costs by **50%[4]**

Leverage 'what if' planning
