

Windows Server 2008 & 2008 R2 End of Extended Support: January 14, 2020

On January 14, 2020, support for Windows Server 2008 and 2008 R2 will end. That means the end of regular security updates. Don't let your infrastructure and applications go unprotected. We're here to help you migrate to current versions for greater security, performance, and innovation.

THE COSTS OF RUNNING UNSUPPORTED SOFTWARE

LOSS OF FUNCTIONALITY

Outdated hardware and software hinder innovation.

INCREASED RISK

Loss of OS security patches and updates; loss of 3rd party software support.

COMPLIANCE CONCERNS

May fail to meet industry standards and regulations: GDPR, HIPAA, PCI, SOX, US FISMA, NIST's SP 800-53 Rev 4 Guidelines, FedRAMP, etc.

HIGHER MAINTENANCE COSTS

Cost of maintaining legacy infrastructure increases, as does unplanned downtime.

THE BENEFITS OF MODERNIZATION

Decrease "Technical Debt."

Improve data security and compliance.

Easier path to hybrid cloud with HCI.

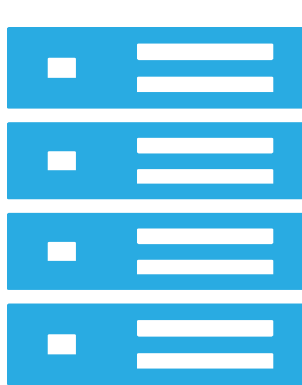

Support expanding workloads and DevOps.

Three options to migrate:

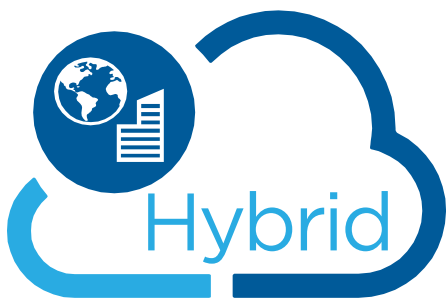

MIGRATE TO **AZURE** WITH FREE SECURITY UPDATES

- Rehost Windows Server 2008 and 2008 R2 workloads to Azure.
- Get three years of Extended Security Updates at no additional charge, and upgrade to a current version when ready.
- Use existing licenses and save up to 80 percent on Azure Virtual Machines with Azure Hybrid Benefit and Reserved Instances.

UPGRADE ON-PREMISES TO **WINDOWS SERVER** **2019** WITH THE LATEST **INTEL SERVERS**

- Upgrade to Windows Server 2019 with the latest Intel® Xeon® scalable servers. They provide the latest in hardware-based security, performance enhancements, and converged designs needed to support today's most demanding workloads.

HYBRID CLOUD SOLUTION

- Reduce your recovery times and rebound quickly from outages.
- Lower costs of server operation and maintenance.
- Ensure consistency through common management tools.
