

Workplace MODERNIZATION | End User Compute & Productivity

## Simplify your support model with Apple Device as a Service.

By delivering a device of your choice married with the services you and your user community need, Zones can help simplify how you procure, pay for, and manage the services your organization relies on. We'll supply, configure or enroll in MDM, deploy, support, and retire your device at a single cost, all with program management support to make sure the services we're delivering are bringing value to your team.

Choose from one of our pre-bundled Apple device standards for a quick turn-around and implementation or work with us to develop a tailored solution that meets your custom needs. We're here to make sure you get the right fleet of devices for your users and to make sure those devices are being supported throughout their entire lifecycle.
