Data Protection That Includes ARCserve® D2D:
Better. Brighter. Smarter.

ca ARCserve®
More Than Backup

Save Valuable Time and Money with CA ARCserve D2D r16

BETTER:

With CA ARCserve D2D, your IT staff can centrally manage your organization's local and remote data protection needs, including systems and data recovery—in minutes—to a physical or virtual standby environment. Slash recovery times by up to 80%.

BRIGHTER:

Use CA ARCserve D2D r16 to leverage cloud storage and offset capital expenditures, as well as for keeping critical information offsite and better protected.

SMARTER:

With ARCserve D2D as part of your data protection strategy, the end result can be lower and smarter IT expenditures, greater efficiency and 100% confidence that you can meet and exceed your data protection service level agreements. Discover the Infinite Possibilities of CA ARCserve D2D today:

- Recover to dissimilar hardware in minutes
- Use with both physical and virtual devices
- Automation and central management with reporting
- Leverage a mix of physical and virtual environments
- Complement your existing tape backup solution
