

Microsoft® SharePoint® Implementation

Business collaboration and content management

Collaborate, Communicate, and Organize

Zones infrastructure implementation services will get your business started with either a SharePoint Server or a SharePoint Services platform. The Zones Advanced Solutions Group consists of experienced Microsoft certified engineers, trained to provide outstanding service and integration using Microsoft best practices methodology. Our engineers hold specializations and competencies in Microsoft SharePoint solutions to ensure your SharePoint environment is easily managed and extremely useful in achieving your business goals.

SharePoint Implementation

Zones is able to provide the necessary skills to your organization specified by Microsoft for proper design, planning and implementation of a SharePoint environment.

- **Easy and consistent user experience** – Simplify how users interact with processes and business data by integrating SharePoint Server with desktop applications, e-mail and Web browsers.
- **Productivity improvement** – Increase efficiency by taking advantage of out-of-the-box workflows for initiating, tracking, and reporting common business activities.
- **Single, integrated platform** – Manage intranet, extranet and Internet applications across the enterprise. Office SharePoint Server is built on an open, scalable architecture, with support for Web services and interoperability standards including XML and Simple Object Access Protocol (SOAP).
- **Centralized report center** – Empower employees to make better-informed decisions by presenting business-critical information in one central location.
- **Increased sharing of business practices and data** – Utilize electronic forms-driven solutions to collect business data from customers, partners or suppliers through a Web browser. Share the data without divulging sensitive information.
- **Meet regulatory requirements** – Maintain comprehensive control over content by using security settings and policies for storage and auditing, along with expiration actions for business records in accordance with compliance regulations.
