

Software Implementation

Comprehensive software services

Configure, Consolidate, Install and Deploy

Managing software applications is one of the most time-consuming tasks that an IT professional performs. Numerous studies estimate the lifecycle of an application or operating system between 18 to 30 months long, making it the fastest evolving component of your IT environment. Let Zones certified engineers maximize the efficiency of today's new technology by providing solutions that meet your unique environment and requirements.

Software Implementation

At Zones, we partner with world-leading software manufacturers to ensure structured, accurate and hassle-free software deployments. We are committed to keeping our engineers trained, certified and prepared to tackle any challenge that comes with software implementation projects. From the simple tasks of deploying software upgrades and patches to the more involved complete rollouts, our IT lifecycle expertise and experience provides you with the best solutions.

Increase the efficiency, priority level, and productivity of your IT staff and users by keeping them focused on running your business. Our systematic approach integrates software services into the workflow with minimal disruptions to your business operations

- **Project implementation** – On-time delivery is the number one priority when Zones manages a project. You receive a well planned solution that meets or exceeds any service level agreement.
- **Seamless software integration** – Integrate software solutions efficiently across your organization without disruption to business operations.
- **Improved software management** – Utilize improved tools to proactively manage software applications more effectively throughout the lifecycle.
- **Improved efficiency of in-house staff** – Allow your in-house team to focus on the job at hand and not the tasks involved with managing software implementations or upgrades.

Zones Advanced Solutions Group

The Zones Difference is Your Advantage
